## MESILLA VALLEY METROPOLITAN PLANNING ORGANIZATION BICYCLE AND PEDESTRIAN FACILITIES ADVISORY COMMITTEE

### AGENDA

The following is the agenda for the Mesilla Valley Metropolitan Planning Organization's (MPO) Bicycle and Pedestrian Advisory Committee meeting to be held on **January 17, 2017 at 5:00 p.m.** in the **Doña Ana Commission Chambers, 845 Motel Boulevard**, Las Cruces, New Mexico. Meeting packets are available on the [Mesilla Valley MPO website](#).

The Mesilla Valley MPO does not discriminate on the basis of race, religion, sex, sexual orientation, gender identity, color, ancestry, serious medical condition, national origin, age, or disability in the provision of services. The Mesilla Valley MPO will make reasonable accommodation for a qualified individual who wishes to attend this public meeting. Please notify the Mesilla Valley MPO at least 48 hours before the meeting by calling 528-3043 (voice) or 1-800-659-8331 (TTY) if accommodation is necessary. This document can be made available in alternative formats by calling the same numbers listed above. *Este documento está disponible en español llamando al teléfono de la Organización de Planificación Metropolitana del Valle de Mesilla: 528-3043 (Voz) o 1-800-659-8331 (TTY).*

1. **CALL TO ORDER** \_\_\_\_\_ **Chair**
2. **APPROVAL OF AGENDA** \_\_\_\_\_ **Chair**
3. **APPROVAL OF MINUTES** \_\_\_\_\_ **Chair**
  - 3.1. October 18, 2016 \_\_\_\_\_
4. **PUBLIC COMMENT** \_\_\_\_\_ **Chair**
5. **ELECTION OF BPAC OFFICERS FOR CY 2017**
5. **DISCUSSION ITEMS** \_\_\_\_\_
  - 5.1. Proposed FY 2016-2021 TIP Amendment \_\_\_\_\_ **MPO Staff**
  - 5.2. Proposed FY2017- FY2018 UPWP Amendment \_\_\_\_\_ **MPO Staff**
6. **COMMITTEE and STAFF COMMENTS** \_\_\_\_\_
  - 6.1. MPO Update: \_\_\_\_\_ **MPO Staff**
  - 6.2. Local Projects update \_\_\_\_\_ **CLC, DAC, TOM, NMSU Staff**
  - 6.3. NMDOT Projects update \_\_\_\_\_ **NMDOT Staff**
  - 6.4. Committee Members update
7. **PUBLIC COMMENT** \_\_\_\_\_ **Chair**
8. **ADJOURNMENT** \_\_\_\_\_ **Chair**

1                   **MESILLA VALLEY METROPOLITAN PLANNING ORGANIZATION**  
2                   **BICYCLE AND PEDESTRIAN FACILITIES ADVISORY COMMITTEE**  
3

4   The following are minutes for the meeting of the Bicycle and Pedestrian Facilities  
5   Advisory Committee of the Mesilla Valley Metropolitan Planning Organization (MPO)  
6   which was held October 18, 2016 at 5:00 p.m. in Commission Chambers at Dona Ana  
7   County Government Building, 845 Motel Blvd., Las Cruces, New Mexico.  
8

9   **MEMBERS PRESENT:**     George Pearson, Chair (City of Las Cruces Citizen Rep)  
10                             Ashleigh Curry (Mesilla Citizen Rep)  
11                             Jolene Herrera (NMDOT)  
12                             Mark Leisher (DAC Citizen Rep) (departed 6:29)  
13                             James Nunez (City of Las Cruces Rep)  
14                             Lisa Willman - proxy Gabriel Rochelle (Bicycle Com. Rep.)  
15                             Jorge Castillo - proxy Samuel Paz (Dona Ana County)  
16                             David Shearer (NMSU - Environ. Safety) (departed 5:30)  
17                             Lance Shepan (Mesilla Marshall's Department)  
18                             Andrew Bencomo (Ped. Community Rep)  
19

20   **MEMBERS ABSENT:**     Maggie Billings  
21

22   **STAFF PRESENT:**       Tom Murphy (MPO)  
23                             Andrew Wray (MPO)  
24                             Michael McAdams (MPO)  
25                             Dominic Loya (MPO)  
26

27   **OTHERS PRESENT:**     Becky Baum, Recording Secretary, RC Creations, LLC  
28

29   **1.     CALL TO ORDER (5:00 p.m.)**  
30

31   Pearson:     Okay, it looks like we're at 5:00 and we've got probably everybody that's  
32                   going to come here, so I'll call this meeting of the MPO Bicycle and  
33                   Pedestrian Facilities Advisory Committee to order. It's right at 5:00 I think.  
34                   Let's just go through introductions. Will you start, David?  
35

36   Shearer:     David Shearer, New Mexico State University.  
37

38   Herrera:     Jolene Herrera, NMDOT.  
39

40   Shepan:     Lance Shepan, Mesilla Marshal's Office.  
41

42   Curry:       Ashleigh Curry, Town of Mesilla Citizens' Representative.  
43

44   Willman:     Lisa Willman serving as fill-in for, proxy, pardon me, proxy for Gabriel  
45                   Rochelle.  
46

1 Nunez: James Nunez, the City of Las Cruces.  
2  
3 Bencomo: Andrew Bencomo, Community Pedestrian Representative.  
4  
5 Castillo: Jorge Castillo, Dona Ana County, proxy for Samuel Paz.  
6  
7 Leisher: Mark Leisher, Dona Ana Citizen Rep.  
8  
9 Pearson: I'm George Pearson, City of Las Cruces Citizen Rep.

10  
11 **2. APPROVAL OF AGENDA**

12  
13 Pearson: So next we have the an approval of the agenda. Are there any changes  
14 ...

15  
16 Wray: No.

17  
18 Pearson: To the agenda from staff?

19  
20 Curry: I did note a change, oh sorry, no, pardon me. No, I was looking at  
21 minutes.

22  
23 Pearson: Okay. We're on the agenda. I'll hear a motion to approve the agenda as  
24 presented.

25  
26 Shearer: I move.

27  
28 Curry: I second.

29  
30 Pearson: I have a motion and a second. All in favor, "aye."

31  
32 MOTION PASSES UNANIMOUSLY.

33  
34 Pearson: Any opposed?

35  
36 **3. APPROVAL OF MINUTES**

37  
38 **3.1 August 19, 2016**

39  
40 Pearson: So next we come to the approval of minutes. We've got two minutes to  
41 approve so first we'll talk about the August 16th minutes. Any discussion?

42  
43 Curry: Yes. I'd like to note on Members Present it said Blake Stogner in proxy for  
44 Gabriel Rochelle but Gabriel was here and Blake wasn't so maybe that  
45 was left over from a previous one.  
46

1 Pearson: Any other comments?  
2

3 Castillo: I have a few comments. The, so it was August and September, it's page  
4 28 line 32, the minutes say "font sales," that should be "font size." Line 37  
5 there were several "it's" there, a "where" is missing, "where it enhances."  
6 And the last one is line 40 where it says "floor of arroyos," that should be  
7 "flow, F-L-O-W of arroyos." Thank you.  
8

9 Pearson: Any other comments? So I'll hear a motion to approve as amended.  
10

11 Herrera: I move to approve the minutes as amended.  
12

13 Bencomo: Second.  
14

15 Pearson: With a motion and a second. All in favor, "aye."  
16

17 MOTION PASSES UNANIMOUSLY.  
18

19 Pearson: Any opposed? So that passes.  
20

### 21 **3.2 September 20, 2016 Special Meeting** 22

23 Pearson: Next we have the minutes from September 20th. Any discussion?  
24 Hearing none, I'll hear a motion to approve.  
25

26 Bencomo: So moved.  
27

28 Pearson: And a second?  
29

30 Shepan: Lance Shepan.  
31

32 Pearson: Having a motion and a second, all in favor, "aye."  
33

34 MOTION PASSES UNANIMOUSLY.  
35

36 Pearson: Any opposed? So that moves us past the approval of the minutes.  
37

## 38 **4. PUBLIC COMMENT** 39

40 Pearson: Next we have public comment. Any members of the public wish to  
41 comment at this point? Seeing none.  
42

## 43 **5. ACTION ITEMS** 44

### 45 **5.1 Amendments to the 2016-2021 Transportation Improvement Program** 46

1 Pearson: We'll move on to action items. We have a TIP amendment.

2

3 ANDREW WRAY GAVE HIS PRESENTATION.

4

5 Pearson: Okay so the RoadRUNNER that's not new funding, it's just money that's,  
6 was there that's just being moved around?

7

8 Wray: Some of it is new.

9

10 Pearson: Okay.

11

12 Wray: Portions of it are new. But some of it is, has been in the TIP too so it's a  
13 mix.

14

15 Pearson: And the US-70 project, that's just a pavement preservation, that's not  
16 related to the various phase projects that, or the feasibility study for one of  
17 the phases?

18

19 Herrera: Yeah, Mr. Chair. Actually this pavement preservation project is sort of in  
20 the middle of that capacity study but the engineers decided that the  
21 pavement is getting really bad and that we're not going to be able to wait  
22 until the study is done and we get a project designed there so they wanted  
23 to put this in there just to take care of that really poor pavement condition.

24

25 Pearson: Any further discussion from the Committee Members? Hearing none, I'll  
26 hear a motion to approve as presented.

27

28 Bencomo: So moved.

29

30 Shearer: I second.

31

32 Pearson: There's a motion and a second. All in favor, "aye."

33

34 MOTION PASSES UNANIMOUSLY.

35

36 Pearson: Any opposed? That passes.

37

## 38 **5.2 Missouri Avenue Study**

39

40 Pearson: So now we're on to the Missouri Avenue study.

41

42 ANDREW WRAY GAVE HIS PRESENTATION.

43

44 Curry: Mr. Wray it says "Missouri Avenue Extension Alternative 2 and  
45 Roadrunner Extension Alternative 2," is one of those maybe a three?

46

1 Wray: You are correct. Yes, the slide is in error. I will make a note and correct  
2 that. Yes you are correct. Roadrunner Extension is alternative 3.  
3  
4 Curry: Thank you.  
5  
6 ANDREW WRAY CONTINUED WITH HIS PRESENTATION.  
7  
8 Pearson: Okay. Thank you. While I quickly move to the recommendation page  
9 eight, so it says "Two alternative, two alternatives are recommended for  
10 further analysis," and then from there it's kind of hard to figure out what  
11 they actually are. I wonder if you could delineate a little bit further the non-  
12 motorized and the other one and ...  
13  
14 Wray: You mean in the text of the document?  
15  
16 Pearson: Right.  
17  
18 Wray: Okay. We can certainly ...  
19  
20 Pearson: It just ...  
21  
22 Wray: Certainly do that.  
23  
24 Pearson: Cause I think that's where people will jump to, for the meat of "What does  
25 this report do?" is that they're going to look at the recommendations and,  
26 and I, paging through the rest of it, it looks like you now, you always refer  
27 to the other alternatives as "Alternative 2," "Alternative 3," or whatever. So  
28 maybe in that section you should also reference ...  
29  
30 Wray: Okay.  
31  
32 Pearson: The alternative number. The other question that I had that was discussed  
33 but I don't really see it as part of, it wasn't part of your presentation, the  
34 Alternative 6, the bike/ped, pedestrian alternative, there was also some  
35 discussion at least of retaining the complete right-of-way that would be  
36 needed for the full build-out.  
37  
38 Wray: Yes. That, that would be the idea is if, if a non-motorized facility is  
39 constructed the right-of-way to potentially build out Missouri completely  
40 would be retained so that that facility could be constructed at a later date if  
41 needed.  
42  
43 Pearson: So I wonder if that needs to be explicitly stated as part of ...  
44  
45 Wray: We can certainly do that.  
46

1 Pearson: That's, any other Committee Members?  
2  
3 Herrera: Mr. Chair. I have a couple of comments. On page 53 when you get into  
4 the travel demand model pictures, so there's, Figure 12 is Alternative 2  
5 and then Figure 13 is Alternative 4, so Alternative 3's completely missing.  
6 Which I know it's not being recommended but it still should be in here  
7 somewhere. And then on page 55 they're numbered so Alternative 1 has  
8 the little description and then, I'm sorry Alternative 2 has the description,  
9 Alternative 3 is blank. And then just a quick question about the evaluation  
10 matrix. I think that it was a lot of information but I think it was helpful to  
11 just have a snapshot of kind of everything. Is there a, can you include that  
12 in the appendix?  
13  
14 Wray: Mr. Chair, Ms. Herrera. It actually is included in the appendix.  
15  
16 Herrera: Okay.  
17  
18 Wray: We don't physically have the ability to print it at the City. It, it came on a, a  
19 nonstandard size sheet of paper and we, we tried, believe me. We, we  
20 could not print it at a legible size today.  
21  
22 Herrera: Okay.  
23  
24 Wray: So that was just technical impossibility.  
25  
26 Herrera: No, that's perfectly fine. I just think that it's ...  
27  
28 Wray: We, what ...  
29  
30 Herrera: Good information.  
31  
32 Wray: What I can do is this, maybe not this week because I realize that the draft  
33 report needs a lot of work to kind of get it up to snuff but as soon as  
34 possible I'll get a copy up onto the website that'll obviously include the  
35 alternative matrix and I will let this Committee know when that's available  
36 for download and review.  
37  
38 Herrera: Okay. Thank you. I just, I know that we've seen it before, well I've seen it  
39 quite a bit and it's really helpful so it's good to know it's in there. And  
40 that's all I had, Mr. Chair. Thanks.  
41  
42 Pearson: Other Members? Go ahead.  
43  
44 Castillo: Yes. When did you say the deadline for comments from this body would  
45 be?  
46

1 Wray: Technically we can accept comments up until the Policy Committee finally  
2 approves it. From a realistic standpoint, probably the Monday of the  
3 Policy Committee meeting in November which I don't have a, a calendar  
4 handy to check the date but it's the second, the second Monday of  
5 November. We probably need to cut off comments at that time.  
6

7 Castillo: All right. Thank you.  
8

9 Nunez: Mr. Chair. The, say this is Phase A. I was curious, it, Phase B is that  
10 where they do a, a cost analysis?  
11

12 Wray: Yes.  
13

14 Nunez: All right. Thanks.  
15

16 Pearson: So with that, if there are no more comments then our action is to approve,  
17 recommend approval of this report to the Policy Committee. Hear a  
18 motion to make that approval.  
19

20 Shearer: I move that we make it, move forward with this.  
21

22 Nunez: Second.  
23

24 Pearson: Having a motion and a second, all in favor, "aye."  
25

26 MOTION PASSES UNANIMOUSLY.  
27

28 Pearson: Any opposed? So that item passes.  
29

### 30 **5.3 Transportation Alternative Program Application Recommendation**

31  
32 Pearson: Next is the transportation alternative program application  
33 recommendations.  
34

35 ANDREW WRAY GAVE HIS PRESENTATION.  
36

37 Pearson: Maybe we should get all the applications and take a recess and then ...  
38

39 Wray: Our, our hope, if, if the Committee wants to do it that way, that will be fine  
40 but our hope was that we would be able to, to review each application  
41 individually and provide an individual recommendation from this  
42 Committee. But if, if you want to have them all distributed and then, then  
43 have a single discussion that would be fine too.  
44

45 Pearson: Well I was, that, since we haven't seen these at all I just think ...  
46

1 Wray: That ...  
2  
3 Pearson: Just do ...  
4  
5 Wray: That would be fine.  
6  
7 Pearson: The review period and then we can do each ...  
8  
9 Wray: Go ahead and ...  
10  
11 Pearson: Talk about each one separately.  
12  
13 Wray: Okay. We'll do that. Dom will hand out the rest of them for you.  
14  
15 Pearson: So we can temporarily adjourn.  
16  
17 Wray: Call a recess I think is ...  
18  
19 Pearson: Call a recess. So I get to call a recess myself or do we need a vote?  
20  
21 Shepan: You can do it.  
22  
23 Bencomo: I think there is ...  
24  
25 Wray: I do not know the answer to that actually whether you can, whether you  
26 can ...  
27  
28 Bencomo: I think we need a vote.  
29  
30 Castillo: You can call a recess.  
31  
32 Pearson: Okay I'll call a recess.  
33  
34 Wray: Okay.  
35  
36 Pearson: Until we review some of these applications.  
37  
38 COMMITTEE RECESSES 12 MINUTES.  
39  
40 Wray: Am I to understand you're ready to go?  
41  
42 Pearson: Call back to order. David Shearer for the record did leave, so he had  
43 another commitment.  
44  
45 Wray: Right. Thank you Mr. Chair. At this time we would like to introduce  
46 discussion of the Las Cruces Public Schools traffic calming projects. The,

1 there is a list of the, the projects in the application packet. The aim is to  
2 improve traffic calming circumstances in the vicinity of a number of  
3 schools. I apologize, I actually do not actually have a list of them here  
4 myself but I'd like to turn the floor over at this time to Ms. Curry for her to  
5 give a fuller presentation on the item.  
6

7 Curry:

8 Thank you Mr. Wray, Mr. Chair. The, as, as Mr. Wray said the idea about  
9 the, behind this is traffic calming. We have 25 elementary schools and  
10 eight middle schools in Las Cruces that we're particularly working around  
11 here for traffic calming. There are several schools that are next to high-  
12 speed roads that traffic is unaware that there is a school zone in  
13 instances, the schools of Columbia, Tombaugh, Valley View, University  
14 Hills, Sonoma, Jornada, Desert Hills, Fairacres, Cesar Chavez and  
15 Sunrise which are next door to each other, Alameda, Conlee, and  
16 Highland. And the idea behind this application is that some of the schools  
17 would be put forward to receive a study to determine if permanent flashers  
18 would be necessary and they are the radar feedback flashers, so not just  
19 a yellow flashing "School Zone" sign but the ones that flash and say "Your  
20 Speed Is 25 miles an hour" or whatever the, whatever the speed is that  
21 somebody's going. So those would be, there would be a study done to  
22 determine the necessity of those around those schools, and also for some,  
23 several mobile dollies. So what that means is they're carts that are set up  
24 and if there's a problem area then the cart could be moved from school to  
25 school. That's just because we know it's really expensive to try to put  
26 these flashers at every single school. So if we have mobile ones we work  
27 with law enforcement and the Safe Routes to School and we would  
28 determine where they would be most needed.

29 So Safe Routes to School has a monthly coalition that meets, that  
30 includes people from law enforcement, from traffic and engineering,  
31 volunteers, Department of Health, a number of people that would all give  
32 input into, into this, this piece, so it's not, so it's not Las Cruces Public  
33 Schools working in a silo here. Ninety-two thousand, oh sorry. Not  
34 \$92,000; it's \$139,600 that's being requested for this. And I'd like to  
35 actually just give a quick story. Last week we got a report from a parent  
36 that there was a child who was hit on Missouri Avenue in front of Conlee  
37 Elementary at the crosswalk, a midblock crossing. She was crossing the  
38 road, didn't stop for the cars, the car stopped for her and somebody else  
39 didn't see her and crossed, and it was just cars traveling at a high speed.  
40 It's a very fast road. She was okay but it could've been a lot worse and so  
41 those are the kinds of things that we're really trying to prevent. So if we're  
42 encouraging our children to reduce traffic and walking back to school we  
43 want to provide an environment that's safe for them. If there are any  
44 questions about it I'd be happy to answer what I can.

1 Shepan: Ms. Curry as, and I was trying to figure out what page this was but it's the  
2 one with kind of a, a budget done up on it, on the Smart Traffic Speed  
3 Trailers.  
4  
5 Curry: Okay.  
6  
7 Shepan: Just to confirm what I was thinking, I looked up Custom Signal Smart  
8 Trailers. Their lowest-end model is the Model 650 and that's \$5,000.  
9  
10 Curry: What does it say on that? I'm not, I'm, haven't come across the page yet.  
11 Is the, is it this page here? Okay. Dollies, \$12,000.  
12  
13 Shepan: And then \$12,000 for the Speed Trailers.  
14  
15 Curry: Okay, and ...  
16  
17 Shepan: So if, if they were going with the \$5,000 model with their budget that's  
18 here, they're only going to get two of 'em. You've seen the one we have in  
19 Mesilla. That is a higher-end one. To re, to buy a brand-new one that  
20 was right around, actually it's a little bit more than what's budgeted here  
21 for a brand-new one.  
22  
23 Curry: Okay.  
24  
25 Shepan: We just spend \$2,000 to fix our trailer. So it, they might want to look at ...  
26  
27 Curry: Increasing that number.  
28  
29 Shepan: Increasing that number because the one that they show from Custom  
30 Signal, the, the Model 650, you're not going to be, they're not going to  
31 move that one around a whole bunch without, before they're going to start  
32 having trouble with it and then there's going to be a cost to 'em to replace  
33 it. My suggestion is, is to buy better ones up front so they don't have to try  
34 to Band-Aid 'em later. Cause that's what happened to us.  
35  
36 Curry: Thank you for that recommendation. And would you be able to tell me  
37 where did, where did you purchase yours from or what would you  
38 recommend?  
39  
40 Shepan: We got ours from LCPD before I got on the Department and total we've  
41 probably put \$5,000 into that trailer to get it to where now it works and it's  
42 fully solar-powered and I, now I can leave it out for weeks at a time. If you  
43 can get with me later on in the week I can pull up some documents and  
44 show you what I would like for Mesilla to get ...  
45  
46 Curry: Okay.

1  
2 Shepan: Eventually but I have some recommendations I can bring to you.  
3  
4 Curry: Super. Thank you so much. I'll connect with you.  
5  
6 Wray: Mr. Chair. Could I interject here and I apologize to the Committee. I failed  
7 to mention, we're not just asking for an, a recommendation on these items.  
8 We're also take, this is an opportunity for the BPAC to provide suggestions  
9 as Mr. Shepan just did, this is an opportunity for the BPAC to provide  
10 suggestions to the jurisdictions for ways in which their applications could  
11 be approved. So while we are asking for a recommendation on these  
12 items tonight to the Policy Committee we are also asking the, the BPAC to  
13 evaluate the recommendation and see if there are ways, or evaluate the  
14 application and see if there are ways that they could be improved and then  
15 the, the it'll be up to the jurisdictions to determine whether or not they wish  
16 to amend their applications in any way but staff is open to receiving those  
17 amendments and we certainly encourage the jurisdictions to implement  
18 suggestions up until November the 30th which is the deadline when MPO  
19 staff has to submit. So I apologize Mr. Chair.  
20  
21 Shepan: Actually I have one more thing on that. With only getting one or two  
22 trailers with so many schools, and I know this from experience because  
23 when we put the trailer out in front of the elementary school then the  
24 middle school's calling it, the neighbors on McDowell are calling for it. We  
25 just get bombarded with requests for it all of a sudden, "Well why isn't it  
26 over here? It's more important over here than there." So the more trailers  
27 they have the better off, their phone calls would be less I guess you might  
28 say.  
29  
30 Curry: Thank you. I think the idea behind it was just trying to keep the application  
31 to a reasonable amount so that ...  
32  
33 Shepan: Right.  
34  
35 Curry: It gets approved because if you ask for too much it's, you know you might  
36 get nothing and we thought at least start with something.  
37  
38 Shepan: Right.  
39  
40 Curry: The two mobile, but I, I hear your thoughts on that and I think that does  
41 make sense especially when you only have two for a, 33 schools.  
42  
43 Bencomo: Mr. Chair. So a, a comment on that also, Lance. It, I think there might be  
44 a difference too cause yours are used for enforcement and that's what,  
45 they're not?  
46

1 Shepan: No, ours are not used for enforcement. They're, they're just notifying.  
2 We, there's a speed limit sign on top of it which correlates to the street that  
3 it's on and then it flashes your speed as you go by. That's all it does.  
4

5 Bencomo: But ...  
6

7 Shepan: It doesn't issue citations, we don't issue citations off of it. It's just a  
8 warning device to let you know how fast you're going.  
9

10 Bencomo: Okay. I was just curious if it might be a difference with a law enforcement  
11 agency having it compared to the schools having it, the schools are more  
12 for notification in different areas so ...  
13

14 Shepan: Right.  
15

16 Bencomo: Anyway, thanks.  
17

18 Shepan: It, it would do the same thing as the flashing lights in front of Mesilla  
19 Elementary School. That notifies vehicles of how fast they're going.  
20 That's all.  
21

22 Curry: Thank you. And I think just to add, we have noticed an enormous  
23 difference in traffic speed in front of Mesilla Elementary with, since putting  
24 in that solar feedback speed limit sign. They've really made a huge  
25 difference to cars paying attention and slowing down.  
26

27 Shepan: Depends on who you ask.  
28

29 Curry: That's me witnessing it.  
30

31 Herrera: Mr. Chair.  
32

33 Pearson: Jolene.  
34

35 Herrera: I have a whole list of comments.  
36

37 Pearson: Of course.  
38

39 Herrera: But it's only because I would like you guys to get funding and so I want to  
40 make sure that your application is as good as it can be when it goes up  
41 against all the other ones in the state. So some of them are a little picky  
42 but on the TAP application itself, number 5c I guess is not filled out.  
43 That's one of the things that the guide clearly says, is don't leave anything  
44 blank so I'm sure you can find some way to write something up in there.  
45 So make sure that everything is completely filled out. Also, there's a lot of  
46 missing information as far as you don't have letters of support from the

1 City, the County for all of the roads that these signs are going to be  
2 installed on. That's missing from here. You don't have a letter or a  
3 resolution from Las Cruces Public Schools saying that they're going to pay  
4 the local match.  
5  
6 Curry: Ms. Herrera. I believe that all of that was submitted.  
7  
8 Wray: It ...  
9  
10 Curry: They may have just not have printed ...  
11  
12 Wray: It ...  
13  
14 Curry: This for the package.  
15  
16 Wray: It should have been in there.  
17  
18 Herrera: Okay. It's not in this package that you just handed me.  
19  
20 Wray: Okay. I will ...  
21  
22 Curry: Yes.  
23  
24 Wray: See what I can do about getting, getting to the bottom of that. I'm not sure  
25 what's happened there.  
26  
27 Herrera: Okay, yeah.  
28  
29 Curry: Yeah.  
30  
31 Wray: But yes there, there are letters of support from LCPD ...  
32  
33 Curry: Yeah.  
34  
35 Wray: From the City Manager's Office of City of Las Cruces.  
36  
37 Curry: Maybe you look at the back sides. Are you looking at backs ...  
38  
39 Herrera: Yeah, I did. I went through everything pretty thoroughly and there's ...  
40  
41 Curry: Did you? Okay.  
42  
43 Herrera: Yeah.  
44  
45 Curry: So ...  
46

1 Herrera: They're not in here.  
2  
3 Curry: We have from NMDOT, we do have a letter of support from the school  
4 district, you, we have the Resolution Number 2008-25 for the Complete  
5 Streets and the Resolution Number 09-301 again for Complete Streets,  
6 one's Mesilla, one is the City; we have David Maestas ...  
7  
8 Herrera: Oh, there they are.  
9  
10 Curry: Transportation Director.  
11  
12 Herrera: Okay. They're like in the middle of the Safe Routes to School plan. Okay.  
13 So that ...  
14  
15 Curry: From the ...  
16  
17 Herrera: Takes care of all of those.  
18  
19 Curry: Associate Superintendent, the Police Department letter of support. So I  
20 think un, unless you see something additional missing I think we were  
21 fairly thorough. And I don't believe we got a letter of support from Harold  
22 Love but we got a signature from him which we were told sufficed.  
23  
24 Herrera: The signature suffices for the Project Feasibility form saying it's a feasible  
25 project but if you're looking to put a device on NMDOT right-of-way you're  
26 going to need a letter of support from District 1 saying that that's okay.  
27  
28 Curry: Would you write us a letter of support please?  
29  
30 Herrera: That has to come from Harold.  
31  
32 Curry: Okay.  
33  
34 Pearson: She tried.  
35  
36 Herrera: Yeah. I would love to but I'm not the authority for District 1. Okay. So I  
37 think that pretty much takes care of everything except for on the PIF form,  
38 there's a lot of forms, but the Project Identification Form there's also some  
39 things missing on there; number 34, number 36, and number 39 are not  
40 filled out so just if ...  
41  
42 Curry: Thank you very much. I really appreciate that.  
43  
44 Herrera: And everything else I think looks good.  
45  
46 Curry: Good.

1  
2 Herrera: It's a good application.  
3  
4 Curry: Thank you very much.  
5  
6 Nunez: Mr. Chair.  
7  
8 Pearson: Yes.  
9  
10 Nunez: A couple items. The page 3 of 4, item 27 says "amount amount" but I,  
11 maybe it's been mentioned already, Federal, Local, Tribal, or Other so if  
12 we can have those values. I noticed the same thing about what you talked  
13 about Ms. Herrera. The letters, I did see those but I did not see one from  
14 the Project Development, in other words as I, help me understand, I was  
15 trying to read a little bit in detail of what, what all you're asking for. You're  
16 asking for a, it talks about road calming. You asking for any road changes  
17 or anything from the City, so it'll be a design, or is it ...  
18  
19 Curry: No. It wouldn't be road changes. It would be, some of them would be  
20 structures, signage that would be put in. So that would be the radar, the  
21 permanent radar feedback signage and there are those pictures where  
22 he's identified where, so the study would need to have been confirmed  
23 that those would be needed and then determine exactly where they would  
24 be placed according to MUTCD standards and ...  
25  
26 Nunez: So my question is, is the, are the City of Las Cruces engineers to design  
27 that, or is David Maestas' group which they typically do not, or is it the Las  
28 Cruces Public Schools engineers to get the ...  
29  
30 Curry: No, I believe that it's David Maestas who had said that you know in his  
31 letter he said "The City Traffic Engineering Department supports your  
32 efforts in applying and will assist our coordinated efforts to maintain Safe  
33 Routes to School and keeping Safe Routes to School," oh that's the  
34 coordinator one.  
35  
36 Nunez: Right, I think ...  
37  
38 Curry: Okay. Let me look, let me look into that.  
39  
40 Nunez: To, if you, if you can just make sure that it's ...  
41  
42 Curry: Yeah. Let me look into that.  
43  
44 Nunez: It's, it's addressed is my point.  
45  
46 Curry: Thank you.

1  
2 Nunez: So that if you need design ...  
3  
4 Curry: Yeah.  
5  
6 Nunez: Funds then it would be included or David Maestas' group is going to  
7 provide a design for a contract ...  
8  
9 Curry: My ...  
10  
11 Nunez: To do that work.  
12  
13 Curry: And I, and I will need to look into that in more detail but my understanding  
14 is that we would apply for funds to be able to pay for it because I know the  
15 last time we did Safe Routes to School the City ended up having to do the  
16 design and we've tried to commit to not doing that again, putting them in  
17 that position. So on this we have specific support, I believe it would come  
18 from, funding would come from an outside source to provide that. But let  
19 me verify that before ...  
20  
21 Nunez: All right.  
22  
23 Curry: We do that definitively. Thank you.  
24  
25 Nunez: And then the last item, I'm, I did hear you mention the number of  
26 elementary schools and then the other middle schools and then I counted  
27 up the, the, the schools that you have listed here which is about 12 or so,  
28 about half, or your list, or less than half. But the, I was thinking of, just as  
29 you mentioned others going to be calling is actually providing maybe one  
30 of these to a private school?  
31  
32 Curry: Sure. This ...  
33  
34 Nunez: For, for a little bit. You see my point?  
35  
36 Curry: Well yes. So I tell you what, Las, the Las Cruces Public Schools is putting  
37 forth this application.  
38  
39 Nunez: Oh, I got you.  
40  
41 Curry: If a private school wanted to do it, that's fine.  
42  
43 Nunez: All right.  
44  
45 Curry: We do partner as much as we can in the spirit of communication and  
46 partnership. We communicate with the public schools, with the private

1 schools if they need us but you know really priority would go to Las  
2 Cruces Public Schools since this is a Las Cruces Public Schools  
3 application.  
4  
5 Nunez: Makes sense. Okay. I'm, I'm new to this. Thanks.  
6  
7 Herrera: Mr. Chair.  
8  
9 Pearson: Yes.  
10  
11 Herrera: I just have one more, so I read the letters now that I found them. Thank  
12 you. The only thing that I don't see in here is who's going to be paying the  
13 power bills for the, are they all solar then with no sort of power backup?  
14  
15 Curry: Correct.  
16  
17 Herrera: Okay. And to make sure on your application that if you are planning, if the  
18 schools are planning to get some engineering funding to put a plan set  
19 together that that's made clear in the application somewhere. And actually  
20 it's in those boxes that were pointed out. It has a specific part for  
21 preliminary engineering and all that so.  
22  
23 Curry: Thank you. I'll confirm that.  
24  
25 Herrera: Okay. Thanks.  
26  
27 Pearson: Any other comments on this one?  
28  
29 Castillo: Mr. Chair. Just a few comments. The, I, I would pay special attention to  
30 the naming of the project. I think it's, it's, in one of the forms it just  
31 mentions traffic calming. In the other form it mentions a program. So just  
32 be clearer about that. That, that would make it easier for the reader. And  
33 several times you mention data. I don't know if you have any actual data  
34 on like number of either traffic citations or actual number of complaints,  
35 increase, decrease. If you do that would be helpful. Mr. Nunez mentioned  
36 something about one of the budgets. I, I, I would, I would encourage you  
37 to double-check both budget numbers. I, I, I saw some inconsistencies in,  
38 in the budget numbers so just check those. And then lastly I would kind of  
39 reiterate what Ms. Herrera had mentioned on number 36 which is security  
40 of motorized or non-motorized users. I mean the whole point to the  
41 project is for the non-motorized users so I would definitely add something  
42 in that item. Thank you.  
43  
44 Curry: Thank you very much. Could I just ask you, you said you saw some  
45 budget number inconsistencies. Can you point to those specifically so I  
46 can know exactly what ...

1  
2 Castillo: Yeah. Without looking through the, the, the, the, the pile right now, so one  
3 of the main ones where it asks for the, the overall breakdown, I think it's  
4 like \$139,000 and then if you look at the other two itemized items it's  
5 \$85,000 plus \$34,000 so either something's missing, or it doesn't equal  
6 \$139,000.  
7  
8 Curry: Thank you. I'll look into that. Appreciate that.  
9  
10 Pearson: Any other comments? So with those comments, so we should just take a  
11 vote to ...  
12  
13 Wray: We, we ...  
14  
15 Pearson: Move this forward.  
16  
17 Wray: Do need a vote Mr. Chair.  
18  
19 Pearson: So I'll hear a motion to move this project forward.  
20  
21 Herrera: I move to move this project forward with the comments from the  
22 Committee I guess reviewed.  
23  
24 Pearson: And a second?  
25  
26 Nunez: Second.  
27  
28 Pearson: We have a motion and a second. All in favor, "aye."  
29  
30 MOTION PASSES UNANIMOUSLY.  
31  
32 Pearson: Any opposed? Move onto the next one.  
33  
34 Wray: Thank you Mr. Chair. We'd like to direct the Committee's attention now to  
35 the Safe Routes to School Coordinator position application. This is an, a  
36 position of importance to the Las Cruces Public Schools SRTS Program.  
37 This is, it's the Coordinator position is essentially the person who heads up  
38 and sort of guides the implementation of SRTS throughout the LCPS  
39 system. This is a position that's been in existence with the MPO for six or  
40 seven years now. We've had a, a couple of people come and go through  
41 the position. It was originally housed within Mesilla Valley MPO, at that  
42 time Las Cruces MPO staff, has since shifted to be within the Las Cruces  
43 Public Schools' own staff and I will now turn the floor over to Ms. Ashleigh  
44 Curry who is the current incumbent of that position.  
45

1 Curry: Thank you Mr. Wray and Mr. Chair. So as Mr. Wray said this is a  
2 continuation of, of funding that we're requesting for the Safe Routes to  
3 School Coordinator position. It's one of the few things that is verified in  
4 the TAP applications as being available for funding specifically with every  
5 school coordinator position. We're proposing, it's currently 20 hours a  
6 week. We're proposing to move that to 25 hours a week. As Mr. Wray  
7 said when the, when the program got started it's been under various,  
8 various umbrellas of funding. We also had a Champion position, a Safe  
9 Routes to School Champion that was housed through the Town of Mesilla  
10 originally and the program was a pilot program and moved on to, we are  
11 now involved in 100% of our elementary schools and lightly involved in all  
12 of our middle schools as well: Education, encouragement, just getting  
13 programs up and going and then of course coordinating engineering  
14 needs between schools and the City engineer, the Town, and the County.  
15 So it's an important position to keep things moving forward. We've been  
16 going for ten years in, again some of it under the MPO, some of it under  
17 the Town of Mesilla. But the Safe Routes to School has been going for  
18 ten years and I believe has really got a good amount of success and we'd  
19 like to just keep that moving forward. This is one of the few places that we  
20 can get funding for this position so if it didn't come from TAP funds I'm not  
21 sure that we'd be able to continue funding this elsewhere. This school  
22 district supports the, supports the program very well. It, it works well to be  
23 in the school district, that we have access to children and be able to go do  
24 the education in the schools with the children and of course there's the  
25 LCPS match. I, I should also just add we do have two half-time positions  
26 that are currently funded just one year out for, through the Department of  
27 Health that also fund two other Champions that assist with the  
28 encouragement and education pieces.  
29  
30 Herrera: Mr. Chair. If I can just add that this is the only successful Safe Routes to  
31 School program in the state. It's a good one.  
32  
33 Pearson: So do you have any picky? I saw one empty box.  
34  
35 Herrera: I do. On the Project Information, Identification Form, the PIF, sorry  
36 number 19 and number 36 are blank. Especially number 36 I think you  
37 want to talk about, and I saw the letters and things were in here as well so  
38 that's really the only thing. Just those two.  
39  
40 Curry: Thank you very much.  
41  
42 Pearson: Yeah. I think from my perspective if nothing else gets funded this is the  
43 project that needs to be funded so I would heartily approve this  
44 submission.  
45  
46 Curry: Thank you.

1  
2 Pearson: Anybody else have comments? James.  
3  
4 Nunez: Just the number 27 again, 3 of 4, breakout of the funds, I, I don't know if  
5 they require amounts in the different columns; Federal, Tribal, Local, or  
6 Other.  
7  
8 Curry: Page 27, is that what you said?  
9  
10 Nunez: Page 3 of 4, block 27 or question 27.  
11  
12 Herrera: Mr. Chair. That's one of those weird ones, so this form is used for every  
13 kind of project and it doesn't fit some of them so that's probably why it's  
14 not filled out cause there's really no preliminary engineering/right-of-way  
15 construction. So I think on this form, the way that it's filled out it's fine but  
16 on the previous application definitely fill in those different lines.  
17  
18 Curry: Thank you Ms. Herrera. I think somewhere in the instructions it does say  
19 "where applicable" because this is the one thing that's a coordinator. The  
20 majority of the TAP funding is for infrastructure pieces.  
21  
22 Wray: Ms. ...  
23  
24 Curry: But thank you for noticing.  
25  
26 Wray: Mr. Chair, Ms. Herrera. Would it be helpful to at least put "N/A" in the  
27 spots just to make sure that the Committee up in Santa Fe who'll be  
28 evaluating this knows that the applicant is aware and has made a  
29 conscious decision that this question does not apply to me?  
30  
31 Herrera: Yes. That ...  
32  
33 Curry: Yeah. Okay.  
34  
35 Herrera: It can never hurt.  
36  
37 Pearson: Right. That's one area where the TAP programs were designed for  
38 construction projects for the most part but this is a program project so we  
39 have to make sure that it does fit in. Any other comments? Do I hear a  
40 motion to move this project forward?  
41  
42 Bencomo: Mr. Chair.  
43  
44 Pearson: Yes.  
45  
46 Bencomo: Point of order. Does Ashleigh need to recuse herself from this vote?

1  
2 Wray: Sure.  
3  
4 Pearson: We can do a roll call vote and Ashleigh could abstain. So Andrew could  
5 you take the roll call?  
6  
7 Wray: There's no second.  
8  
9 Pearson: Oh yes.  
10  
11 Wray: Actually there's no motion.  
12  
13 Pearson: There's no motion.  
14  
15 Herrera: Mr. Chair. I move that we approve this application.  
16  
17 Bencomo: Second.  
18  
19 Pearson: Okay. With a motion and a second, Andrew roll call please.  
20  
21 Wray: Ms. Herrera.  
22  
23 Herrera: Yes.  
24  
25 Wray: Mr. Shepan.  
26  
27 Shepan: Yes.  
28  
29 Wray: Ms. Curry.  
30  
31 Curry: Abstain.  
32  
33 Wray: Ms. Willman.  
34  
35 Willman: Yes.  
36  
37 Wray: Mr. Nunez.  
38  
39 Nunez: Yes.  
40  
41 Wray: Mr. Bencomo.  
42  
43 Bencomo: Yes.  
44  
45 Wray: Mr. Castillo.  
46

1 Castillo: Yes.  
2  
3 Wray: Mr. Chair.  
4  
5 Pearson: Yes.  
6  
7 Leisher: Yes.  
8  
9 Pearson: Oh, and Mark.  
10  
11 Wray: Oh, I'm, I am so sorry Mr. Leisher. I apologize. Mr. Leisher.  
12  
13 Leisher: Yes.  
14  
15 Wray: I'm sorry. You're so quiet over there.  
16  
17 Leisher: Yes.

18  
19 MOTION PASSES.  
20

21 Wray: All right. Thank you Mr. Chair. I would like to turn the attention of the  
22 Committee now to the application from the Town of Mesilla regarding the  
23 multi-use path along Calle del Norte. This application is a development of  
24 the work that I'm sure this Committee remembers earlier this year of  
25 designating the southern loop of the Las Cruces Multi-Use Path. Town of  
26 Mesilla is proposing connecting more or less the spot where the La  
27 Llorona Trail meets with Calle del Norte. Unfortunately there's some issue  
28 as far as ownership actually making a physical connection, so effectively  
29 starting from that intersecting point on Calle del Norte and then, then  
30 pushing the trail out to the east. Sorry, I lost my sense of, my inner  
31 compass there. We have Larry Shannon from the Town of Mesilla to  
32 speak on behalf of that application tonight.  
33

34 Shannon: Okay. There, the primary purpose of this application is to complete the  
35 Intercity Bicycle and Pedestrian Loop by connecting La Llorona Trail with  
36 the Mesilla, Mesilla Valley Multi-Use Connection Loop. So what we're  
37 looking at doing is going from La Llorona down Calle del Norte, down to  
38 the lateral. You have a map in your application that shows it going all the  
39 way to 28. We prefer not to do that. The funding is actually for the lateral  
40 then we would take the lateral down to either Union or to University. But  
41 right now the benefit primarily would be connect the, to complete that loop  
42 for the trail and the benefit to Mesilla in doing that would be that because  
43 Mesilla is primarily a, a, a, a tourist town we have quite a bit of pedestrian,  
44 quite a bit of bicycling, quite a bit of vehicular traffic. This would help to  
45 separate the bicycle traffic down Calle del Norte from the, the, what motor  
46 traffic would make it a safer pedestrian and bicycle route along Calle del

1 Norte. So safety would be a primary result of the, of this application. Plus  
2 the fact that because Mesilla is such a small town because it does rely  
3 heavily on the tourist industry and because bicycling is a major part of that  
4 this would be a definite benefit to the Town of Mesilla economically  
5 because it will help to promote bicycle and pedestrian traffic from La  
6 Llorona. By completing a loop you'll be able to get down to University  
7 from La Llorona. So it would benefit us because of the fact that we would  
8 bring in more pedestrian and more bicycle traffic and more economic  
9 growth to the city.

10

11 Pearson: So is that ...

12

13 Shannon: But this, at ...

14

15 Pearson: Economic aspect, is that part of the application included in part of the  
16 narrative of the application?

17

18 Shannon: I'm sorry?

19

20 Pearson: Is, okay.

21

22 Shannon: Yes.

23

24 Bencomo: Mr. Chair.

25

26 Pearson: Yes.

27

28 Bencomo: I've got a bunch of notes on this one.

29

30 Pearson: Okay.

31

32 Bencomo: So just some, some suggestions on wording in, in the application. The,  
33 the, under the "Economic Vitality/Retail Growth" the Rio Grande Trail is in  
34 the works right now. It's going to happen I believe. The State is pushing  
35 that and it's, it's moving along, there's meetings happening so, and then  
36 the City of Las Cruces just passed a resolution to designate,  
37 recommending designation of the La Llorona Trail to be part of the Rio  
38 Grande Trail. So now that connectivity is even more important  
39 economically, vitality-wise, tourist, tourism-wise. So if some wording  
40 talking about the Rio Grande Trail, the possibility of that in the future, the  
41 City of Las Cruces passing that resolution. Those are I think some very  
42 powerful arguments for, for putting that piece in.

43

44 Pearson: Well it's gone past that. The, the La Llorona Trail has been accepted as  
45 part of the Rio Grande Trail.

46

1 Bencomo: They did that at the last meeting of the ...  
2  
3 Pearson: Yes. They had a meeting ...  
4  
5 Bencomo: Rio Grande Trail ...  
6  
7 Pearson: Special meeting in October and actually the Governor's going to be here  
8 on Thursday to indoctrinate it into the system.  
9  
10 Bencomo: Okay. Good. So yeah, so that's a, that's a big piece I think. "Safety and  
11 Security," I'm sorry, still writing notes, okay. "Safety and Security" is  
12 section three. There's, there's not any mention in the text itself, you  
13 mentioned it discussion-wise but in the text, the large numbers of bikers  
14 and runners. I use that, we, my group uses that road a lot. We run out to  
15 the river and back. There's tons of bikers up and down that road all the  
16 time. They use it as a, as a major route whether to go to Snow Road or all  
17 the way out to South Fairacres Road, they use that route quite a bit. I  
18 think Lance can attest to this, there are multiple races that head down  
19 pieces of Calle del Norte, come out of the plaza and onto Calle del Norte.  
20 He's shaking his head, he doesn't like that but it's a good route.  
21  
22 Shepan: They're better now that we run them backwards.  
23  
24 Bencomo: Oh, okay.  
25  
26 Shepan: Runners are, they behave better now.  
27  
28 Bencomo: Yeah. So, so there's, there's a lot of races that are held. Mesilla's a, is a,  
29 is a huge place for races that go on there so that, that's another piece of  
30 not only "Safety and Security" but also "Economic Vitality." It also kind of  
31 fits into there cause it brings people into the community for that. Number  
32 four, "Accessibility and Mobility through Integration and Connectivity," just  
33 some wording changes maybe. It says, I mean it's your document but  
34 says, "This project will complete the Intercity Bicycle Loop" but it really  
35 won't. There are some pieces missing, they're not in Mesilla but there's  
36 some pieces miss, so I would suggest wording perhaps says "This project  
37 is a key component of the completion of the Intercity Loop" rather than "It  
38 completes it" cause there's some other pieces that need to be done.  
39 And then maybe listing the connectivity, the connectivity if once the,  
40 that loop is, is completed it's a key component of it, will connect Las  
41 Cruces, NMSU, Dona Ana County, and Mesilla. All the entities in the area  
42 will, if you list them all that's going to, that, that will eventually connect  
43 them. Also something that I, I would like to see not only in this application  
44 but generally speaking from the, from the BPAC as we move forward, we,  
45 we're talking about multi-use trails and I think we need to, to change, is it, I  
46 hate the, the term because everybody says it now, "flip the script" but

1 anyway, use different words. These multi-use trails are not just recreation  
2 because when you say "recreation" they're way down at the bottom of the  
3 list. And these multi-use trails are not just for recreation. They, I did a, a  
4 kind of a self-drawn map using the bus route system and if we put some of  
5 these trails in that we're talking about there's tons of connectivity with  
6 parks, with schools, with bus stops that go right through the area, they're  
7 alternative transportation routes. They're not just recreation trails. They're  
8 used for recreation, they, to get people out. So we needed to start I think  
9 you could, be a more powerful argument to say they are alternative  
10 transportation routes for mass transit, parks, businesses, not just for  
11 recreation.

12 And then under 5b, again "How will it improve the quality of life?"  
13 Once again if you connect to mass transit people can have more quality of  
14 life, routes to businesses perhaps, and then another thing that is, is kind of  
15 an intangible but when you have these trails out there for people to go out  
16 and do those things and people get out and they connect, they meet, you  
17 start building a sense of community, that is an enhancement to your  
18 quality of life by building community, by meeting your neighbors, by doing  
19 those type of things. That's the kind of wording I think that needs to be  
20 used in these application projects also.

21 And then I have a final comment but, I mean a question for Ms.  
22 Herrera may, perhaps. Letters of support, are those only accepted from  
23 entities or perhaps could something like Southern New Mexico Trail  
24 Alliance, Las Cruces Roadrunners running group, could they provide  
25 those, community groups?

26  
27 Herrera: Certainly. I think the clarification is if there's a facility being proposed on  
28 somebody else's right-of-way that is a required letter of support but there's  
29 definitely others that could support projects.

30  
31 Bencomo: Okay.

32  
33 Herrera: And yeah, that's definitely, it helps the application because it gives it more  
34 of a regional feel ...

35  
36 Bencomo: Right.

37  
38 Herrera: To the people in Santa Fe.

39  
40 Bencomo: Awesome. Great. Yeah, because there are, there are at least four groups  
41 I know of that I, I'm 99.9% sure would give you a letter of support.  
42 They're, they're community groups. They're not governmental entities.  
43 So, and that's all my comments. Thank you.

44  
45 Curry: Mr. Chair. I might add to that that I think Safe Routes to School, the Las  
46 Cruces Public Schools would write a letter of support for that because

1 ultimately it, it provides that alternative transportation for our students  
2 when the, when the complete loop is, is completed. So this is a piece of  
3 that too.  
4  
5 Pearson: Any other comments?  
6  
7 Herrera: Mr. Chair. Sorry. Now I have my whole list. First of all the Project  
8 Identification Form is completely missing from the application. That needs  
9 to be filled out. Maybe, Andrew if you can just maybe resend the form.  
10  
11 Wray: It's, Town of Mesilla had that attached. I'm not sure, maybe something  
12 has gotten jumbled in the printing ...  
13  
14 Herrera: Okay.  
15  
16 Wray: Would potentially be my guess. I, the, Harold signed the document. I, I  
17 know he did. I've seen it.  
18  
19 Baum: You're not on the microphone.  
20  
21 Herrera: Sorry. The Project Feasibility Form is there, the one signed by Harold, but  
22 the actual Project Identification Form that has ...  
23  
24 Wray: Oh, oh.  
25  
26 Herrera: All of the detailed information, that's missing. So I don't know if the Town  
27 filled that out and maybe it's just not here. Either way it needs to be  
28 included.  
29  
30 Shannon: I'll find out.  
31  
32 Wray: No, that's ...  
33  
34 Herrera: Okay so I guess moving on, I did notice that Calle del Norte, well it is a  
35 State road and there's no letter of support from District 1 so that's  
36 something that's going to be needed and you can contact Mr. Harold Love  
37 for that. Also the funding I'm a little bit worried about, on the Project  
38 Feasibility Form, well from the cost estimate and everything that it, it looks  
39 like you want to split the \$616,365 equally between both years but that's  
40 not really how the funding works for this program. Really it's, the first year  
41 so Fiscal Year 2018 would be to complete your preliminary engineering  
42 and then the following fiscal year would be the construction funding. So  
43 when you fill out the Project Identification Form make sure that you're  
44 pretty clear on how much you need for preliminary engineering, and  
45 there's already a cost estimate in here that looks good so just taking those  
46 numbers and filling in the right boxes with this is, that's all that really needs

1 to happen there. And then also there's no mention of the MPO's trail map  
2 and plan on this application but this is part of it, and it's another planning  
3 document that can give you more points on your application so definitely  
4 mention that and include that somehow in your application. And then the  
5 map, this map is okay but it might be good to add another map that's a  
6 little more zoomed-out that shows kind of the connectivity and actually if  
7 you want to just include the MPO's trail map and kind of mark that up too,  
8 that might be helpful just cause it shows how this piece connects to the  
9 other trails.

10  
11 Shannon: So I apologize about the map. I did the map and it was ten-minute map  
12 there so, "We need a map." And, but yeah that definitely does need to be  
13 modified for the real application.  
14

15 Herrera: Yeah. I mean I think this is good for showing a close-up but just  
16 something that shows a little bit more connectivity regionally would be  
17 good.  
18

19 Shannon: Okay.  
20

21 Herrera: And that's all that I have, Mr. Chair. Thanks.  
22

23 Curry: Mr. Chair, Mr. Shannon. I wanted to ask you, have you been in touch with  
24 the other entity, the International Boundary Waters that would actually do  
25 the connection between the end of Calle del, Calle del Norte and the La  
26 Llorona beginning trail, or the trailhead?  
27

28 Shannon: Well I'm standing in tonight but to be honest with you I don't believe so,  
29 but I'll find out.  
30

31 Curry: Cause I think that that would also be a letter, a good letter of support or a  
32 letter just showing there's that connectivity because if somebody did  
33 realize that there's another small segment that involves a different entity,  
34 it's probably good that that other entity; a) knows that you're planning on  
35 this and; b) if we could get a letter of support from them that would be  
36 even stronger.  
37

38 Shannon: Okay.  
39

40 Pearson: Yeah the La Llorona Trail is in the IBWC area so somebody from the City  
41 presumably knows the correct contact if you can't find it yourself.  
42

43 Shannon: Okay.  
44

1 Pearson: Any other comments? So as far as voting on this one there was  
2 suggested that perhaps the Town of Mesilla Representative shouldn't vote  
3 since it's a town project.  
4  
5 UNKNOWN: *(inaudible)*.  
6  
7 Pearson: Okay, so ...  
8  
9 Shannon: I'm Sorry.  
10  
11 Pearson: Lance is agreeing to that and so I'll hear a motion to move this one  
12 forward.  
13  
14 Curry: Mr. Chair. As the Citizen Rep do I get a vote for the Town of Mesilla?  
15  
16 Pearson: I think so, yeah.  
17  
18 Curry: Okay.  
19  
20 Wray: No motion.  
21  
22 Herrera: Mr. Chair. I move to approve this application, I guess with the comments.  
23  
24 Willman: I'll second that.  
25  
26 Pearson: Okay. We have a motion and a second. Will you do a roll call?  
27  
28 Wray: Yes sir. Mr. Leisher.  
29  
30 Leisher: Yes.  
31  
32 Wray: Mr. Castillo.  
33  
34 Castillo: Yes.  
35  
36 Wray: Mr. Bencomo.  
37  
38 Bencomo: Yes.  
39  
40 Wray: Mr. Nunez.  
41  
42 Nunez: Yes.  
43  
44 Wray: Ms. Willman.  
45  
46 Willman: Yes.

1  
2 Wray: Ms. Curry.  
3  
4 Curry: Yes.  
5  
6 Wray: Ms. Herrera. Oh excuse me, I'm sorry. I didn't mean to skip you. Mr., Mr.  
7 Shepan.  
8  
9 Shepan: I'm not voting on this.  
10  
11 Pearson: Just say ...  
12  
13 Wray: Just say abstain.  
14  
15 Shepan: Abstain.  
16  
17 Wray: In, in the mic please so it can be on the record.  
18  
19 Shepan: Abstain.  
20  
21 Wray: Thank you. Ms. Herrera.  
22  
23 Herrera: Yes.  
24  
25 Wray: Mr. Chair.  
26  
27 Pearson: Yes.  
28  
29 MOTION PASSES.  
30  
31 Wray: Thank you Mr. Chair. We'd like to turn the attention of the Committee now  
32 to the last application that MPO staff received as part of this. It was from  
33 the City of Las Cruces. The application is for green infrastructure  
34 improvements concentrated in the Downtown area of the City of Las  
35 Cruces. There's also infrastructure traffic calming improvements at a, as a  
36 part of that. We have Mr. Armando Morales here from the City of Las  
37 Cruces staff to speak to the Committee regarding this application.  
38  
39 Leisher: Mr. Chair. A brief aside, I need to leave in about three minutes, so.  
40  
41 Morales: Good afternoon everyone. As you know the City of Las Cruces has been  
42 invested in the Downtown Revitalization for some time now as you can  
43 see with the, the opening of the plaza and with the two-way conversion of  
44 Church and Water going on early next year. And we, we feel that, staff  
45 feels that green infrastructure will serve a number of the goals listed in our  
46 City documents, one of which is the, the MPO's Transit Plan. And some of

1 these goals are to increase pedestrian, bicycle, and economic activity in  
2 the Downtown area and it will also create a sense of place. With  
3 economic activity, as you know bicycles and pedestrians according to the  
4 League of American Bicyclists, they spend more money, or they spend  
5 money more frequently than motorized travelers and, and that's one of  
6 the, the, that's one of the things that we're trying to target for the  
7 Downtown area is to increase those aspects in, in order to increase  
8 economic activity, economic development/activity. And I'll stand for any  
9 questions you guys have.

10

11 Pearson: Could you describe the project a little bit more? Cause it's, it's a ...

12

13 Morales: So ...

14

15 Pearson: Million-dollar project, right?

16

17 Morales: Yes. So what the City has done, or sorry, what the City has done is  
18 they've targeted areas on Church and Water that they believe are good  
19 candidates to be placed for green infrastructure. And that green  
20 infrastructure that was determined there were determined by the City of  
21 Mesa's Green Infrastructure Toolkit in which it addresses all of the, the,  
22 the best areas and the type of activity that is in that area.

23

24 Pearson: So the two-way conversion of Church and Water is going to happen  
25 already.

26

27 Morales: Correct.

28

29 Pearson: And this would not be part of that but, so that project would leave space  
30 where this project would come in and do these kinds of improvements. Is  
31 that what we're looking at?

32

33 Morales: Correct. It is an extension if you will of that project. It is not a part of that  
34 project but it can be looked as an, as an extension. Because of the, the  
35 two-way conversion this, this will have much more benefit because in that  
36 two-way conversion they are going to create an overlay in the Church and  
37 Water area and the cross streets, Bowman, Griggs, Las Cruces, and  
38 Hadley they are going to do a complete reconstruction and in that  
39 reconstruction they're going to have, include green infrastructure. So  
40 there will already be green infrastructure in those cross streets but the  
41 two-way conversion project will not include green infrastructure on Church  
42 and Water. And that is what we are applying for, to extend green  
43 infrastructure to these streets to continue green infrastructure in the whole  
44 Downtown area.

45

46 Bencomo: Mr. Chair.

1  
2 Pearson: Yes.  
3  
4 Bencomo: So for my education cause I read it briefly or quickly and, and I saw, what  
5 do you mean, when you say "green infrastructure," I have an idea what  
6 that is, but what do you mean by that? What is the green infrastructure, I  
7 saw trees in there, is that, I mean those are literally green infrastructure  
8 but what, what is it?  
9  
10 Morales: Green infrastructure is essentially strategic placement of things like trees,  
11 (*inaudible*) and drainage to liven up the neighborhood as well as help, help  
12 the, the terrain flow better as far as things like, like drainage and, and help  
13 with traffic calming and, and ...  
14  
15 Bencomo: Okay. Okay. And, and those, yeah those general things I, I understand  
16 those but do you know specifically what, I, I saw trees like I said and then  
17 you say "traffic calming." What are they going to do as far as traffic  
18 calming? Is it going to be reduced road widths, is it going to be, what is it  
19 going to be?  
20  
21 Morales: In some areas yes. What we'll do is we'll add curb extensions and that'll  
22 narrow some of the, the driving lanes but what happens also when you  
23 add more I guess visual, visual aids to, to roadways traffic tends to slow  
24 down because there's, there's more things to pay attention to. So with the  
25 increase of essentially things to look at you'll drive at a much slower pace.  
26  
27 Bencomo: Okay. Thank you.  
28  
29 Herrera: Mr. Chair.  
30  
31 Pearson: Jolene.  
32  
33 Herrera: If I could follow that up with the, some of the same comments that we  
34 talked about previously at the Project Feasibility meeting, the scope is still  
35 pretty unclear and I guess to get to the comments just made, you need to  
36 list specific elements. If you're planning on doing curb extensions that  
37 needs to be mentioned specifically. Any kind of schematics or pictures  
38 that you can provide would be better because when you say "green  
39 infrastructure" most people have no idea what you're talking about, just  
40 like we all kind of didn't know. So I think it's good to put the words in here  
41 but any kind of visuals that you can provide. If there's other cities that  
42 have this implemented already that you can take pictures from, all of that  
43 kind of stuff helps. Also the funding is a little bit unclear, so it doesn't look  
44 like you're applying for any kind of engineering funds, so would the City be  
45 doing the plans then?  
46

1 Morales: Correct.  
2  
3 Herrera: Okay. And then for construction management, the City has inspectors  
4 that have certifications to ...  
5  
6 Morales: Ah yes, yes sir.  
7  
8 Herrera: Do that? Okay. So I would be clear about that in the application. Make  
9 sure that you say that. There's also mention of a map in here showing  
10 the, the limits and I'm not sure if it's this one, it's a little unclear if it is this  
11 map so if you can just, I don't have a specific comment. Just make it more  
12 clear I guess.  
13  
14 Morales: Okay.  
15  
16 Herrera: Just think about it from the perspective that the people that are going to be  
17 on this Committee may have never been to Las Cruces, maybe they've  
18 never been Downtown so they probably don't know what it looks like. And  
19 if you can help them see that in their minds you're more likely to get a  
20 better score. That's all the comments I had Mr. Chair.  
21  
22 Pearson: So it's actually the TIDD doing the application that the City represents, or  
23 how, is the fiscal agent? How does that work?  
24  
25 Morales: Yes. The fiscal agent is, is the TIDD.  
26  
27 Pearson: Okay. So it's actually a City application but the funding's coming from the  
28 TIDD, is that how you ...  
29  
30 Morales: Yes sir, yes sir. Sorry. Yes Mr., Mr. Chair.  
31  
32 Pearson: Anybody, go ahead.  
33  
34 Castillo: I, I would agree with both what Mr. Bencomo and Ms. Herrera had  
35 mentioned and include in there a, a more compelling I guess narrative on  
36 how the non-motorized audience is going to benefit from that. You  
37 mentioned something about traffic calming and that does help motorists  
38 but a little more on like the length of the, the walking distance, you know  
39 how many, I think there are some studies that, that talk about maybe a  
40 projected, you know pedestrian counts or just off-street activity, bicyclists  
41 or, or whatever you have just, just to make a, a more compelling narrative  
42 that, that you are addressing some of the, the, the true objective of, of the  
43 TAP program. That's all.  
44  
45 Herrera: Mr. Chair. I guess I just have one more comment. I started reading the  
46 letter here. If you're still able to update this letter I would address it to

1 Daniel Watts and call this a Transportation Alternatives project, not a  
2 Recreational Trails project just because that's a different type of funding  
3 and this project's not eligible for that type of funding. And then also it's  
4 just a little unclear with what you just explained about how the TIDD is the  
5 project sponsor. So is, is that part of the City, because the letter says that  
6 it is.  
7

8 Morales: What, what the TIDD is, is it's, it's a Tax Increment District and it, it  
9 receives its own funding which serves on a, another board which happens  
10 to be the City Council as well. But yes they, I'm sorry can you repeat your  
11 original ...  
12

13 Herrera: Yeah. I'm just a little bit worried about it just because it's pretty clear in the  
14 guide that the sponsor of a project really needs to be a local government.  
15 So I think if it can work to have the TIDD somehow have a MOA or  
16 something with the City so that the City's the actual sponsor of the project.  
17 I might just be confused about how a TIDD works but I don't want your  
18 application to be thrown out just because they're confused about who the  
19 project sponsor's going to be.  
20

21 Wray: Mr. Chair, Ms. Herrera. Would it be appropriate me, for me to ask at this  
22 moment, do you believe the TIDD is an eligible applicant?  
23

24 Herrera: Is it a, the, is it a government agency then, is it ...  
25

26 Bencomo: Mr., Mr. Chair. The, the TIDD is the, the City is the, going to be the project  
27 coordinator. The TIDD is simply a, a, a mechanism for them to direct tax  
28 collection to a specific area of the City. That's all it is. That's, so it's not  
29 the TIDD that would be applying, I believe. It's the City and they would  
30 use TIDD funding, which Tax Increment Development District is just the  
31 Downtown only. That's how they collect the funds that have to stay in that  
32 area and be used. But it's through the City.  
33

34 Herrera: Okay.  
35

36 Bencomo: So, but I think the, whoever the project engineers will be doing that and,  
37 and yeah you might want to, your, to, back to your question about the  
38 engineering piece, you might want to clarify that and they probably know  
39 but the City, if they were going to do all the engineering, it doesn't seem  
40 like they would, like they would ask for a, why would they not pay for the  
41 engineering out of this, so that probably needs to be clarified if they're  
42 going to do that to be sure. Cause typically the City will apply and  
43 engineering will be Phase 1 of that or Phase A, whatever they call it and  
44 then the second part will be construction. So that, if it's not in here it  
45 needs to be clarified also, as Ms. Herrera stated.  
46

1 Herrera: Thanks for the clarification. That makes it a lot more clear. This letter is  
2 very confusing then because it says that the TIDD is going to be the  
3 sponsoring agency of the project. So that wording is ...  
4  
5 Pearson: Yeah, it needs to be ...  
6  
7 Herrera: This letter needs ...  
8  
9 Pearson: That the City is the sponsoring agent.  
10  
11 Herrera: To be reworked.  
12  
13 Pearson: But the money comes from the TIDD.  
14  
15 Herrera: Right. And that's perfectly fine.  
16  
17 Pearson: That's okay.  
18  
19 Herrera: Yeah. That's okay, it's just the way that this is written is not I think how it  
20 works in reality. So just, if you can work on this letter some to make it  
21 clear.  
22  
23 Morales: Yeah.  
24  
25 Herrera: Now I'm done. Thank you Mr. Chair.  
26  
27 Willman: Mr., Mr. Chairman. I would say this picture, the only graphic that's  
28 included, it's just the, kinda the racetrack around where your description  
29 includes primarily Picacho from Main to Campo and on Campo from  
30 Spruce to Lohman. That's not even in the picture. And then of course  
31 Lohman from Campo to Alameda is outside. I mean I, might not make  
32 that much difference. It's just what you're talking about working on isn't  
33 depicted in that picture.  
34  
35 Morales: Okay. I can, I can clear that, that image up then.  
36  
37 Pearson: Okay. Any further discussion? So I'll hear a motion to move this project  
38 forward with the comments.  
39  
40 Bencomo: Mr. Chair. I move that we move this project forward to a vote with the  
41 comments added.  
42  
43 Shepan: Second.  
44  
45 Wray: Did we need to have a recusal discussion regarding this item?  
46

1 Pearson: I think probably in the same idea the Town of Mesilla recused themselves  
2 from their application, so maybe the staff from the City should recuse  
3 themselves?  
4

5 Wray: And I apologize, I did not get the motion and the second, who made them?  
6

7 Bencomo: I made the motion.  
8

9 Pearson: And Lance.  
10

11 Shepan: Lance Shepan, second.  
12

13 Nunez: Since I can't vote can I, I will add in a comment. To make it stronger I  
14 suppose is, I was kind of like you, Andrew, Mr. Bencomo. Green  
15 infrastructure, the, if you, if you read this map, this, this gave me the most  
16 information actually, if you look at the items and the bullets there and I  
17 hope you can somehow highlight it, but the, the, talks about the, I, I, the  
18 little bit that I know about this project is I think that they just really didn't  
19 have the funds to add trees and green and some of the other items so  
20 now with this they'll be able to in the Downtown area. Otherwise they're  
21 just going to have asphalt and they're not going to have other things, and  
22 you guys mentioned the benefits if they had the trees and that should calm  
23 it, blah blah blah. And so, but, but to get, so anyway that, I, I, I would just,  
24 I think with some wording and some, maybe even in color or something  
25 you could make this a little bit, define it up front like Ms. Herrera said and,  
26 and then, cause it, even rereading the description, the second sentence  
27 threw me off. I'll be honest with you. It talked about some benefits or  
28 something. But anyway that, that's my suggestion, just to make it, reread  
29 it, rewrite it a little bit to make it stronger. All right. I'm out. I'm done.  
30

31 Pearson: Okay. So we have our motion and a second.  
32

33 Wray: Mr. Castillo.  
34

35 Castillo: Yes.  
36

37 Wray: Mr. Bencomo.  
38

39 Bencomo: Yes.  
40

41 Wray: Mr. Nunez.  
42

43 Nunez: Recruit, recused.  
44

45 Wray: Ms. Willman.  
46

1 Willman: Yes.  
2  
3 Wray: Ms. Curry.  
4  
5 Curry: Yes.  
6  
7 Wray: Mr. Shepan.  
8  
9 Shepan: Yes.  
10  
11 Wray: Ms. Herrera.  
12  
13 Herrera: Yes.  
14  
15 Wray: Mr. Chair.  
16  
17 Pearson: Yes.  
18  
19 MOTION PASSES.  
20  
21 Pearson: And well before we go on, maybe to form, for the first proposal we didn't  
22 have a roll call vote so maybe we should for the record do the roll call on  
23 that one.  
24  
25 Wray: Is that permissible I guess?  
26  
27 Pearson: Because it's probably appropriate we have, no?  
28  
29 Baum: You already had the vote.  
30  
31 Pearson: No?  
32  
33 Baum: You've already voted, you all said yes, so you're okay with that.  
34  
35 Pearson: Okay.  
36  
37 Wray: Before we move on though I had been directed to, to make a statement to  
38 the Committee and to the applying jurisdictions. Earlier I said that we  
39 would need the applications by November 30th, that, that is the deadline  
40 that MPO staff has to NMDOT. However, due to trying to account for  
41 potential problems that we may have uploading the applications to the ftp  
42 site, it, it would behoove the jurisdictions to have their, their final  
43 completed applications to us by November 23rd. We'll, I'm sure we'll still  
44 take them after that, after that but you have to understand that it, that if  
45 you do push us to the wall like that we may not be able to get it up to  
46 NMDOT in time.

1  
2 Pearson: So is ...  
3  
4 Wray: And NMDOT will not take anything past five o'clock on November 30th no  
5 matter how much we beg and plead. So applying jurisdictions please do  
6 keep that in mind that we really need 'em by November 23rd.  
7  
8 Pearson: So is that the Wednesday before the holiday?  
9  
10 Wray: I have no idea.  
11  
12 Curry: Correct. It is. Correct.  
13  
14 Pearson: Okay.  
15  
16 Wray: Thank you Mr., oh, I'm sorry. I guess ...  
17  
18 Pearson: Okay.  
19  
20 Wray: Have we officially moved on?  
21

#### 22 **5.4 Bicycle/Pedestrian Project Recommendations**

23  
24 Pearson: On to our next item.  
25  
26 Wray: Thank you Mr. Chair. If you'll bear with me for just a moment while I bring  
27 up the next, the next item. At this time I'd like to introduce Mr. Michael  
28 McAdams who is going to speak to the Committee regarding the bicycle  
29 infrastructure projects.  
30  
31 McAdams: Mr. Chairman and Members. It seemed like we met another time this  
32 week too. About, about two weeks ago we got together and we, on, on  
33 the 20th of September we got out the maps, we looked at them. We  
34 decided what would be a good project for implementation and the staff  
35 went back and collected the recommendations on the map and the  
36 comments and we came about with the list you have if you have your  
37 packet of, of about you know several projects we think that will be possible  
38 for implementation. There is an upcoming deadline of November 1st  
39 where we can submit these projects to the ICIP for the City of Las Cruces  
40 and what we've done, and we developed a set of recommendations which  
41 we think would be good to put forward to the City. Now later, the County  
42 projects and other, for Town we'd like to leave for later as their deadline is  
43 January 1st. We'd like to work with the County and with, with the BPAC  
44 on settling that. So today we'd just like to look at the one, the  
45 recommended list, ICIP and prioritize them. And we may want to go  
46 through these individually. It's, Mr. Chairman it's up to you how you want

1 to proceed with this or we can do it collectively you know. I guess the  
2 discussion's now. I guess I'd like to leave it up to discussion at this time.  
3  
4 Pearson: Okay. One project that, maybe it's on here that I don't recognize, but one  
5 that I've been talking about a lot is connecting from Motel Boulevard to the  
6 outfall channel.  
7  
8 McAdams: Okay.  
9  
10 Pearson: The Picacho Middle School has a weekly bicycle program that would use  
11 that.  
12  
13 McAdams: Right.  
14  
15 Pearson: And right now I think it's just, I don't think there's a formal connection  
16 there. I think that there's some private developer land there so identifying  
17 how that would work ...  
18  
19 McAdams: I guess we could look at, I mean we, we'd like to choose from the list we  
20 presented I think because I'm not sure those, those aren't the, the present  
21 list right now. We could add it but we'd like to go with those first and then  
22 proceed with others perhaps.  
23  
24 Bencomo: Mr. Chair.  
25  
26 Pearson: Yes.  
27  
28 Bencomo: I have a question for, so this was the, the, the meeting you're talking about  
29 was the work session we had, correct?  
30  
31 McAdams: Yes. It was.  
32  
33 Bencomo: Okay.  
34  
35 McAdams: Yes.  
36  
37 Bencomo: So we had the work session, we had it, public there, we had us there, we  
38 gave input and this is what we came up with on ...  
39  
40 McAdams: Yes.  
41  
42 Bencomo: The project ...  
43  
44 McAdams: Correct.  
45  
46 Bencomo: Recommendations.

1  
2 McAdams: Correct.  
3  
4 Bencomo: So a couple of questions ...  
5  
6 McAdams: Okay.  
7  
8 Bencomo: And I'll ask them and then we can go ...  
9  
10 McAdams: Okay. Okay, sure.  
11  
12 Bencomo: The color coding on here, just curious what that is and then on ...  
13  
14 McAdams: Oh you mean on the .pdf? Yes, let me show you the code.  
15  
16 Bencomo: Yeah.  
17  
18 McAdams: The coding, color coding on the .pdf you have in front of you, the red of  
19 course is the projects that we see. I, maybe you want to zoom out  
20 because it's like it's too close. And the green are for the, the project, we  
21 have existing bike facilities so, and the numbers are the numbers that are  
22 corresponding with the projects you know. Not sure if I can zoom, yeah.  
23  
24 Bencomo: Okay. So the red are the projects.  
25  
26 McAdams: Right.  
27  
28 Bencomo: The other ones are, are existing bike lanes, the green and the ...  
29  
30 McAdams: Yes.  
31  
32 Bencomo: Maroon is the ...  
33  
34 McAdams: That's, that's correct.  
35  
36 Bencomo: Multi-use trails.  
37  
38 McAdams: Right.  
39  
40 Bencomo: Okay. And the two red, or the one, two, three, looks like four maybe red  
41 projects?  
42  
43 McAdams: Yeah, there's, we can go through those individually if you like.  
44  
45 Bencomo: I, what ...  
46

1 McAdams: Okay.  
2  
3 Bencomo: Are the ...  
4  
5 McAdams: The, if you look at the, you can go by, I like the numbers better so let's go  
6 with the first which is C, CLC001, let me, which is Espina and this is,  
7 would be bike lanes from the university to Lohman and we discussed  
8 about that, it doesn't, it doesn't presently have bike lanes on it.  
9 The second would be, let me get my list out, excuse me, CL, CL02,  
10 I mean let me just go and look real ...  
11  
12 Bencomo: Looks like a typo, looks like a one, two.  
13  
14 McAdams: Well actually 00, CLC01 is Espina. They're not in order because we  
15 picked, they were picked out from the whole list and the second one  
16 probably would be discussed is, would be Spruce, be the 00, CLC07, that  
17 would be a road diet. And that's mainly because of the accidents on that  
18 area. There's a fair amount of accidents involving some pedestrians well  
19 that was also identified as a possible project.  
20 The next one would be Roadrunner which would be, go from, from  
21 Lohman, excuse me from Bataan Memorial to Lohman. That'll be  
22 additional bike lane, bike lanes from, from road, from Roadrunner.  
23  
24 Nunez: Excuse me. Is that number three?  
25  
26 McAdams: That's, CLC0, yes it's 03. That's correct. Okay. Right here, okay. Yeah  
27 right.  
28  
29 Curry: Mr. McAdams, just to clarify are we expected to prioritize these tonight or  
30 what's the expectation here?  
31  
32 McAdams: Yes. We, we'd like to have a prioritization, which you think is one, two,  
33 three, I think there's seven projects would you like, would you one, you  
34 know in order.  
35  
36 Curry: There's seven projects but there're 18 listed on the page that you give us.  
37  
38 McAdams: We, we, these are the ones that we think the, the most appropriate.  
39  
40 Curry: Okay so one to seven you've listed out as being ...  
41  
42 McAdams: Right.  
43  
44 Curry: The most appropriate.  
45  
46 McAdams: Yes ma'am.

1  
2 Curry: And then eight to 18 within the City are, are lower ranked so you've  
3 already ranked them somewhat yourselves.  
4  
5 McAdams: Well we, we, we, yes we ranked them, yeah, what we thought were the, or  
6 the, of the list what would be the most appropriate.  
7  
8 Murphy: Mr. ...  
9  
10 Curry: So you're asking us to rank one through seven ...  
11  
12 McAdams: Yes.  
13  
14 Curry: And ...  
15  
16 McAdams: Yeah.  
17  
18 Curry: Sort of ignore eight to 18 for now.  
19  
20 Murphy: Mr. ...  
21  
22 McAdams: We don't think those are as feasible as the other ones.  
23  
24 Curry: Okay.  
25  
26 Murphy: Mr. Chair, Ms., Ms. Curry. If, if I may. What staff did with the, the  
27 workouts from the sheets from the, from the work session, we took ones  
28 that we could readily identify, kind of immediate projects that, that were,  
29 looked like they were very close to being able to be submitted for  
30 construction. We are, we are, we did speak with the City Public Works  
31 Department and we're looking at a November 1st deadline for submittal to  
32 get into their CIP process so what we'd, we used, we used our judgment  
33 to on a, on the projects that you all had fleshed out at the work session  
34 and said, "Okay we think these could move forward more immediate  
35 based on this very tight, tight deadline," and so what we're coming back to  
36 you this evening is what we want to, is ask, "Out of these seven that, that  
37 we're going to submit into the CIP, in, in, list which ones you know, which,  
38 you know put some sort of order on them," be it so that the City can apply  
39 them into different years as, you know as funding becomes available so.  
40 And then, and then of course the rest of the, rest of the work that, that you  
41 had done in the work session we intend to flesh out further but since we  
42 had a upcoming CIP cycle looking right at us we wanted to proceed with  
43 these seven immediately.  
44

1 Curry: Thank you. That really helps clarify. But to further clarify, we're not  
2 looking at CLC1 through 7, we're looking at anything that has a note of  
3 "CIP" next to it in the right-hand column.  
4  
5 McAdams: Yes.  
6  
7 Curry: Cause that goes through 12.  
8  
9 Murphy: That's correct. And, and anything that you know really is reflected on red.  
10  
11 Curry: Thank you.  
12  
13 Nunez: Mr. Chair. A question.  
14  
15 Pearson: Yes.  
16  
17 Nunez: The, the, so you're looking at just design or, so here's, here's a specific  
18 question.  
19  
20 McAdams: Okay.  
21  
22 Nunez: On CLC7 for example, you talked about a road diet on Spruce, right?  
23  
24 McAdams: Right.  
25  
26 Nunez: Well you're asking to design or a study to see if that's feasible or you're  
27 actually asking, you're, for us to prioritize it to try to get that work done,  
28 designed and completed? I'm not understanding the full scope of this.  
29  
30 Murphy: Mr. Chair, Mr. Nunez. It would depend upon what was, what was  
31 submitted or what came out of that work session. Some of them certainly  
32 are not ready for construction and then are deserving of more study and I  
33 think that, that would get kind of fleshed out during the CIP project. It you  
34 know may need some preliminary engineering, may need some studies,  
35 something like you know, you know Spruce for example we you know  
36 presume that the engineers working on that would you know start doing  
37 speed studies, crash histories, things of that nature as whether to prove it.  
38 But then at the end of it there'd be a potential funding source to, to do the  
39 actual construction if all the studies you know work out.  
40  
41 Nunez: All right, thanks. And to that end Mr. Chair, do you, do you just want us all  
42 to write down these and number and you're going to tally them up in a  
43 table or, cause for I guess my two cents, just looking at this at a glance I  
44 would pursue the bottom ones on the map and then go to the longer,  
45 bigger one, number three, which is behind the dam there, and then on  
46 Spruce maybe last. But that's just ...

1  
2 Pearson: Number three is Roadrunner so ...  
3  
4 Nunez: My first pass you know.  
5  
6 Pearson: Yeah, it's ...  
7  
8 Nunez: So anyway go ahead, sorry sir. I'm done.  
9  
10 Pearson: Because questions about other, there are a couple of other road diet  
11 projects that have been talked about, Idaho and Alameda, but they're not  
12 on this list and they, the other question, like the CLC08, that project is  
13 going to happen as far as I know. I just was hearing from the Traffic  
14 Engineer today that that's something like four months out. That's funded  
15 by State Capital Improvement Funds, or State set-aside funds.  
16  
17 McAdams: I'm, I haven't heard that Mr. Chairman. I haven't heard that that was  
18 funded for the pedestrian crossing at University.  
19  
20 Curry: It, we spoke to Sue Young today.  
21  
22 Pearson: With HAWK signals.  
23  
24 McAdams: Okay.  
25  
26 Curry: Yeah.  
27  
28 McAdams: That's, that's news to me.  
29  
30 Murphy: Mr., Mr. Chair, Ms. Curry. The, did you speak with them about HAWK  
31 signals by the Chick-fil-A facility?  
32  
33 Pearson: Yes. Also.  
34  
35 Curry: Both.  
36  
37 Murphy: Oh, both, both of those locations, okay.  
38  
39 Pearson: Yeah, the Chick-fil-A location ...  
40  
41 Murphy: All right, was ...  
42  
43 Pearson: Was being installed by developers and what he had said is he's not going  
44 to sign off on a certificate of occupancy for that building until issues are  
45 resolved so that those get installed. They're fighting about how much  
46 money to spend on that.

1  
2 Murphy: Okay. And then to a previous statement I, and I, I do remember us  
3 speaking about road diets on Alameda and Idaho previously. I, but I kind  
4 of don't remember it coming through on the, on the sheet that we had  
5 made off of your, go ahead Andrew.  
6  
7 Wray: Mr. Chair. I don't recall that particular road diet being discussed at the  
8 September 20th meeting so that's the reason why it did not appear on this  
9 list. Now I may have missed something but I, I don't remember hearing  
10 that.  
11  
12 Pearson: Yeah.  
13  
14 Wray: So if, if MPO staff didn't hear it or it didn't get written down then it didn't get  
15 generated on this, on this list.  
16  
17 Murphy: Yeah I think those are, I, I, I, those are straightforward enough concepts,  
18 we've done them here in the past so I think if the Committee would like to  
19 floor-amend this list and add, add those two specific road diets, MPO staff  
20 could, could get those applications, CIP applications in to the City by the  
21 November 1st. But I would also kind of hesitate to expand beyond, any  
22 beyond that at this moment in time.  
23  
24 Pearson: And could you explain the CLC09 project a little bit because ...  
25  
26 McAdams: Yeah.  
27  
28 Pearson: That sound, the location describes the completed ...  
29  
30 McAdams: That would, I think ...  
31  
32 Pearson: NMDOT process, project.  
33  
34 McAdams: I'm not sure if they can, discussing, Mr. Chair. I'm not sure if they're  
35 looking at green lanes there be, so to designate there better because right  
36 now there's kind of confusion about how to get through that area. Same  
37 thing with University, it would be, give better I guess visibility for bikes but I  
38 don't think that that's being considered Mr. Chair. Yes.  
39  
40 Bencomo: Mr. Chair.  
41  
42 McAdams: Yeah.  
43  
44 Bencomo: If I remember correctly because that was specifically brought up and that  
45 is the ...  
46

1 McAdams: Right.  
2  
3 Bencomo: Area where they just redid that and they put the bike lanes and it's a real  
4 nice area but one of the things that was brought up by a member of the  
5 public was at those bike lane crossings where people go onto, through  
6 intersections and things like that the green striping or some way to identify  
7 that because cars turning there creates an extra danger as bikes are  
8 trying to pass on the bike lanes, and so they were talking about some kind  
9 of identification, striping, painting, whatever at those intersections. And  
10 that, I, I think that's why that's on there I believe. Cause that is that same  
11 area where they just redid it on Avenida de Mesilla and it's brand-new so I  
12 think that's what it was if I remember right.  
13  
14 Pearson: Well the City couldn't do that project anyways though then, right?  
15  
16 Herrera: *(inaudible)*.  
17  
18 Pearson: So I think we can, we can scratch CLC9 from the list to consider.  
19  
20 Willman: Mr. Chairman. I, I would like to take off CLC01, just take it off the list. I  
21 mean I ride down Espina every day and the facility is pretty nice. But I  
22 think what would be a very bold move is to move on CLC07. Now that  
23 would impact me personally, helping me to get across town on my bicycle.  
24  
25 Pearson: Right. One of the comments, we don't, we have fairly decent north-south  
26 but we don't have good east-west. So I would agree with that. Actually  
27 that was going to go to a road diet but there was a property owner along  
28 that corridor that objected and there wasn't the political will to fight that.  
29 So it's really, it really needs a road diet. We've got a, it's a middle school  
30 there.  
31  
32 Curry: Sierra.  
33  
34 Willman: Yeah. Sierra.  
35  
36 Pearson: So that would be high on my list also, yes.  
37  
38 Herrera: Mr. Chair.  
39  
40 Pearson: Yes.  
41  
42 Herrera: Can I just ask a general question? So what I've seen in the past on the  
43 ICIPs or CIPs, whatever they're called is that you don't have to be super-  
44 specific on the project, that you can be kind of more general. So I'm  
45 wondering if we can put something in there or recommend to MPO staff to  
46 put something like "study road diets on various roads" so that we can at

1 least do the beginning steps of that, see where they're appropriate. We  
2 can pick the, the roads, the two that you mentioned Mr. Chair, also on  
3 Spruce, the one that's listed here, and then if there's any others to at least  
4 get the planning part of that kind of done, and then maybe on the next  
5 cycle after there's some good data to apply for the construction part. I  
6 don't know, I'm kind of just throwing that out there. I don't know if that's  
7 possible to do at this point in time or ...

8  
9 Bencomo: Mr. Chair.

10  
11 Pearson: Yes.

12  
13 Bencomo: I, I, I would have to agree with that. I, I think that's, it's typically how the  
14 City operates as far as ICIP. They're going to have, just like the, the  
15 applications we just looked at. First year is going to be the, the study, the  
16 design, whatever, they're going to pay for that and then the next year is  
17 going to be that and that's, ICIPs are typically broken up like that. It's not  
18 going to be construction and, and study and design all together, and then  
19 it's a multi-year project. So I, I would have to agree with that. Maybe if, if  
20 you can do it broadly enough just to, to say, "Okay we're going to study  
21 these three streets," or whatever instead being, being down to one, maybe  
22 one, we need funds to, to, to do design, study and design on these three.  
23 I guess it would be study first cause then if the study didn't come out well  
24 they wouldn't design it. So study and then design on these major areas  
25 and then ...

26  
27 Pearson: So maybe our recommendation should be to do the road study, road diet  
28 studies, list some of these streets that we've identified already and others  
29 as appropriate.

30  
31 Curry: Mr. Chair. My thought on it is that if for example like they did on Solano  
32 the road diet, they're willing just to actually do it, I would take it while it's  
33 being offered to do it, and that's what I'm understanding from what Mr.  
34 Murphy said, that these ones look like the most feasible, not a lot you  
35 know, right off the bat. Just jump in and do it. So if a study is required on  
36 it then that's one thing but if, if we're wasting a year by studying something  
37 we, would they, the City, you know they would just adopt "Let's go ahead  
38 and do a road diet on Spruce." I would say let's not waste time studying it  
39 if they could just jump in and actually do it right away.

40  
41 Pearson: Right. Cause I think the point would be to move these projects forward. I  
42 think a road diet on Alameda is pretty obvious. We've got bicycle facilities  
43 to the north and then all of a sudden we've got a, a section, the connecting  
44 east-west is down on Las Cruces Avenue so you've got a big chunk from  
45 Picacho to Las Cruces that is a four-way road where a road diet would

1 make it much safer. So if we can advance that through this process,  
2 advance that project by a year or two that would make overall a better city.

3  
4 Murphy: Mr. Chair, Ms. Curry. I, I, I think Ms. Curry's points are right on. Mr.  
5 McAdams recently attended a workshop, I'm not sure if Jolene was there.

6  
7 Herrera: I was there.

8  
9 McAdams: *(Inaudible)*

10  
11 Murphy: The State's developing further guidance on when to implement where,  
12 where road diets are appropriate and they're, I, I don't know if they've got  
13 a document published yet but it's going to be moving that direction and in  
14 my mind that constitutes a good portion of what we'd be studying. I think  
15 for the main, you know everything else that goes into the studies, things  
16 that can be accumulated fairly quickly, crash history, road, road volume,  
17 speeds on there and you know rather than, rather than do it one year and  
18 then, or study it one year and construct it the next year in every single  
19 case, I vote what we want to do is kind of you know based on, based on  
20 your knowledge and Members of this Committee's knowledges of the, of  
21 the local street system come up with those, those candidates which we  
22 view as, as potential and get them on a list so when the, you know if and  
23 when money comes available those, those improvements can be  
24 implemented.

25  
26 Herrera: Mr. Chair. I definitely appreciate those comments. I guess the only, I  
27 don't know how the City upper management, City Council, I don't know  
28 what, are they just willing to implement things like that without any kind of  
29 data? I mean that's kind of where, so if you're talking about NMDOT,  
30 we're not just gonna implement a road diet without knowing all of the data  
31 and so I, I guess that's a hard call. So I'm looking at it from DOT  
32 perspective, like you do the study and then, but if they're willing to just  
33 jump on board and we say, "Do a road diet," and then they're going to do  
34 it. I mean yeah, let's do that. I just don't know.

35  
36 Murphy: If, if I may, if I may respond. It, I don't think we're going to advocate it in,  
37 in the absence of, of all the data. I think the, those data points are things  
38 that the MPO collects on a continual basis and at the time, you know  
39 absolutely the, the City's Traffic Engineer looks at our data before they do  
40 anything, they'll go out again, they'll, they'll collect their own data to look at  
41 it, you know look at it further. So I don't think any of these things are ever  
42 going to happen without really being studied thoroughly. I think it's more  
43 of a matter of we need, we need some group to say, "This is, this is the  
44 priority areas. We need you to look at these you know to, to do 'em."  
45 And, and I believe that you know I, I think we can be confident that if, if  
46 there's a reason not to do it, if it doesn't make sense from a, a capacity or

1 safety standpoint, the professional engineers are absolutely going to say,  
2 "No way. We're not going to do it."  
3

4 Pearson: Right. Cause another, Boutz might be a place for a road diet by Las  
5 Cruces High School and I actually asked about that and it was like, "No."  
6 And I believe mostly probably because of the, the peak capacity during  
7 beginning and end of school. But that's an area that we actually vitally  
8 need bicycle facilities. It's like a, a bicycle desert there. We have a good,  
9 a destination that should be used by bicyclists but no way to get there.  
10

11 Nunez: If I could Mr. Chair. I agree with Mr. Murphy and I was going to interject  
12 some of that information. The, Spruce is, can be looked at for a road diet  
13 and then, and being four down to three lanes, right, typically is what, what  
14 you do on a road diet. But the one on Boutz you mentioned five lanes  
15 down to three lanes. That's another one of the reasons why it's maybe not  
16 as practical but I, I was actually planning on getting into that a little bit  
17 tonight whenever I had my report for the City. But back to this map, at the  
18 very top: Recommended Bicycle and Pedestrian Projects for the City of  
19 Las Cruces. If I remember right in our discussion we even talked about  
20 how we might try to get some low-hanging fruit. So even my first  
21 comment was the bottom part of this map, the shorter roads. So  
22 whenever I saw Roadrunner, I thought that was pretty big in what you're  
23 asking for a bike path along there. So and in addition to what your first  
24 comment was, is some tie-in at Motel or something, I can't recall. But  
25 anyway the point I was trying to make is that I thought that's what we were  
26 trying to do is get the low-hanging fruit if we could and then next year and  
27 etc. etc. But I, I think to wrap all this around I don't, I, are we getting to a  
28 conclusion on what we're suggesting or buying in for you? I think I, do you  
29 want us all to write down our priorities here or I think we there, are you just  
30 going to go in this, the top seven here, and you've even expanded to your  
31 road diet discussion to two or three projects, which is fine if you want to  
32 look at those. But my last comment on road diets is, and you even asked  
33 me Mr. McAdams I think the other day, there was a, a, think you were in  
34 some study or some training ...  
35

36 McAdams: Right.  
37

38 Nunez: And you said the road diet failed, so I don't have a lot of information on  
39 what specific example you have but sometimes they do with the data that  
40 we get, so whenever we get that, it, Spruce may fail also. We don't know  
41 that until we get into it, right. So anyway I'm, really my question or my, my  
42 drive is, is yeah if you'd like us to priorities, prioritize these I suppose we  
43 could.  
44

45 McAdams: Mr. Chair, Mr. Nunez. I think you're right that sometimes road diets do fail  
46 and that's because perhaps insufficient data and study. I, and also maybe

1 not enough public input as well. That was one of the things they stressed  
2 at the workshop. And I think that we would like to get this on the table so  
3 that the City, City could really consider that it's not just study but these are  
4 some we would like to do. I think to press it, because I think to a certain  
5 degree I agree with Mr. Murphy and also Ms. Herrera too that we need  
6 data and we do have the data for it. But I think that as Ms., Ms. Curry was  
7 saying that we'd like to have these, not just study but let's go ahead and  
8 say, "These were, these are priorities, we should look at them and so we  
9 can get something done." Road diets are fairly easy to accomplish. They,  
10 they can back fire sometime but really they have, they're low capital. They  
11 usually just consist of lane restriping, often they're done as part of  
12 maintenance as well. But there's a good amount of benefits for road diets  
13 in that they particularly reduce rear-ends, sideswipes, etc. and also people  
14 crossing all four lanes. There is significant collisions on, on Spruce as we  
15 know and many of them could be reduced by this, and also there's been  
16 about three, three pedestrian and, and bicycle accidents. I actually, it's  
17 going to be a, not actually, crash (*inaudible*) sign. So I think there's,  
18 there's a good, a, a good, a good reason to look at Spruce as probably a,  
19 a potential candidate for road diet. But I mean as far as a, the, Mr. Chair,  
20 the, this Committee of course is willing to do anything that you feel in your  
21 right to do. These are just suggestions. But I think the really the  
22 imperative we'd like to get, like Mr. Nunez said something on the table,  
23 low-lying fruit, so we can start to move ahead you know. And stuff like the  
24 crossings, the pedestrian crossings at, at Walton are low-lying fruits.  
25 We've already talked with, with several people in Transportation about  
26 that. That would be connected with the, the bus, there's a, two bus routes  
27 that come to that area and that that's, the divot it's, it was originally across  
28 from Wal-Mart, the bus stop, now it's being transferred divot, divot and  
29 course people are going across Walton to get to, to Wal-Mart. And that  
30 would be kind of a low-lying fruit. So it, Mr. Chair it just depends on how  
31 the Committee would like to pursue this. Thank you.

32  
33 Bencomo: Mr. Chair.

34  
35 Pearson: Yes.

36  
37 Bencomo: So at the, at the risk of dragging this meeting on because I see tiredness  
38 in people's faces but, and at the risk of making enemies of MPO staff and  
39 other people ...

40  
41 McAdams: You know me.

42  
43 Bencomo: I'm going to, I'm going to be myself. You mentioned low-hanging fruit  
44 multiple times.

45  
46 McAdams: Right.

1  
2 Bencomo: And yeah I guess it could be termed that. I almost feel like it's the path of  
3 least resistance not low-hanging fruit. I read the title here, it says  
4 "Recommended Bicycle and Pedestrian Projects." Somebody needs to  
5 show me where there's a pedestrian project on there. Those are all bike  
6 lanes. They're in-road facilities. There's no pedestrian ...  
7  
8 Pearson: Well ...  
9  
10 Bencomo: Projects on here.  
11  
12 Pearson: I'll argue that a road diet is a pedestrian project cause that improves safety  
13 for pedestrians.  
14  
15 Curry: Number six. CL06 specifically says "Pedestrian Refuge."  
16  
17 Bencomo: Okay.  
18  
19 McAdams: Right.  
20  
21 Bencomo: I am corrected. There is one on there, it's a pedestrian refuge, it's to ...  
22  
23 Curry: And, and CL08 as well.  
24  
25 Bencomo: Okay. Thank you for that clarification. I just feel like we, we, we're, we're  
26 still taking the pass of, path of least resistance. This is, this is, what we're,  
27 what we're looking at isn't just this upcoming fiscal year or even the year  
28 after that. We, we need to start putting project recommendations in place  
29 into the ICIP that are not going to be probably approved for a decade, but  
30 we have to put them in there now because they're not going to move up  
31 the list unless we do that. And we have to do hard things like if we want to  
32 put multi-use trails like Roadrunner Parkway, you're putting bike lanes in,  
33 there's no sidewalks on half of that road.  
34  
35 Murphy: Exactly.  
36  
37 Bencomo: Well, what, how you going to do that? So a multi-use trail could serve  
38 both purposes there and you could still have bike lanes if you wanted to. I  
39 mean bike lanes, as you're, it has to be a combination of things but we're  
40 not adding those things in here that need to be in there long-term. It took  
41 us 12 years of ICIP on the list to get Fire Station 7 from on the list to  
42 actually start construction, 12 years. Over a decade. They have to be put  
43 in now. We can't wait for those larger projects that are higher-dollar, more  
44 costly, more ambitions. We, we have to do them now. We can't wait.  
45 These ones are great. I don't, not arguing that we shouldn't do these,  
46 especially as we mentioned before the east-west connections there, we

1 don't have good east-west. For example the, the mapping that I've been  
2 looking at and things like that, it would include Roadrunner Parkway multi-  
3 use trail. Espina is wide enough that with a reconstruction project you  
4 could actually add that. Is a reconstruction project very costly in long-  
5 term? Absolutely it is. But is that, that, is that something we want to look  
6 at into the future? Do we want to just keep saying, "Oh let's put them in  
7 the roads and people can walk on side," or do we want to start adding  
8 those features to our city? And if we start now adding those in, then in ten  
9 or 15 years from now we will have those. But we have to start right now.  
10 We have to, or it's not going to happen ever if we keep doing this. Thank  
11 you Mr. Chair.

12  
13 Curry: Mr. Chair. May I add something as well? I think we really need to be, I, I  
14 feel like sometimes these things are rushed and I know we're always on a  
15 time schedule and people are tired and want to go home and whatnot, but  
16 I really feel like we need to be looking at our overview big picture,  
17 connecting the schools, connecting the multi-use trails, connecting all of  
18 the various pieces. And I, I see that you've ordered these in some way but  
19 I would love to see our big-picture map on here of what we have. I know  
20 you've got a little bit of what we have but where are we ultimately going  
21 and how are all of the little pieces on this recommendation furthering our  
22 ultimate goal? And like Mr. Bencomo said we're looking at the, at, at the  
23 long-range picture and there's a little piece here and a little piece there  
24 because somebody came to the meeting last month and made that  
25 recommendation. But how is that enhancing our bigger connectivity  
26 between all of our alternative modes of transportation?  
27

28 McAdams: Mr. Chair, Ms., Ms. Curry. I think that planning is incremental. And it, I  
29 agree with, with Mr. Bencomo too, we have to make bold choices often.  
30 But often we have to make little choices too. Often the big choices, they  
31 have to be in the CI, ICIP many many years before they come about. But  
32 also project being done right away is also imperative too. And I would  
33 love to have the money, I think the City and the State would all also love  
34 the money to do these things but I think that in planning we have to plan  
35 what we can do right now and also put, push long-range project too. And I  
36 think, I agree with you and I bet, agree with Mr. Bencomo as well. So it's,  
37 it's difficult I think right now and, and always we have deadlines. It, it,  
38 deadlines will never go away. And I guess what we're saying, in the  
39 essence we wait would be another year, we may get nothing and so we  
40 have to put forth something in the realization that if we don't ask for  
41 something we'll get nothing. So I agree with both of you. It's a dilemma.  
42

43 Herrera: Mr. Chair.

44  
45 Pearson: Yes.  
46

1 McAdams: Yeah.  
2  
3 Herrera: With all being said ...  
4  
5 McAdams: Right.  
6  
7 Herrera: Can we group some of these together and put them in as one project  
8 instead of having little teeny separate projects? So maybe do like the  
9 pedestrian stuff, so CLC06 I guess is a pedestrian one. Which other one  
10 is a pedestrian?  
11  
12 Curry: 08.  
13  
14 Herrera: 08, so group those together cause they're so small the cost is probably  
15 lower.  
16  
17 Curry: Although, I'm sorry, I say 08 but we really should just strike that from the  
18 list because that's already in funding.  
19  
20 Herrera: Okay. And then also I think we need to get rid of CLC09 which is what we  
21 just talked about, the University part. So take those out and then try to  
22 group some of the others together.  
23  
24 Pearson: Yeah. Roadrunner's probably a project on its own.  
25  
26 Herrera: Right, but some of the smaller ones, and then I also would like to propose  
27 ...  
28  
29 Pearson: But the road diets can be talked about together.  
30  
31 Herrera: Exactly, that we do one project for road diets.  
32  
33 Pearson: And then that leaves the bike lanes for the rest.  
34  
35 Herrera: Yeah. Can we do that? Is that enough prioritization?  
36  
37 Murphy: Mr., Mr. Chair, Ms. Herrera. I believe, I believe so. I'm, with the, with the  
38 caveat this is the first time that the City's invited us into this, this part of  
39 their process so I am, I am uncertain how it's all going to shake out. You  
40 know I, I, the only thing I'm certain on is that we'll hit some point and the  
41 City Council will assign their own priorities so I think that probably is great  
42 help as far as consolidating some, some groups of projects that, you know  
43 that can be put forward. And staff will work on that and we will get a  
44 submittal based on, based on ...  
45  
46 Pearson: Okay.

1  
2 Murphy: All commentary here into the City CIP process and then we'll keep ...  
3  
4 Pearson: So this is an action item, so Jolene could you make a ...  
5  
6 Curry: Can, can I ask another quick question? I'm sorry to, to drag things on, but  
7 what's the difference here under the recommendation for bike lanes  
8 versus bike facilities?  
9  
10 McAdams: I think bike, bike facilities would be like, things like bike tracks I think is a  
11 rule, but they could be interchangeable as well.  
12  
13 Curry: So "bike tracks" meaning?  
14  
15 McAdams: Bike tracks would be separate ...  
16  
17 Pearson: Yeah.  
18  
19 McAdams: Lanes like we talk at University and I-10 that would be separate lanes  
20 going through that area, all right. There's a, we've studied that before.  
21 There's a median there at I-10 and University and that, that would be  
22 possible, but ...  
23  
24 Murphy: Ms. ...  
25  
26 Curry: Well, so like a multi-use trail?  
27  
28 Murphy: Mr. Chair ...  
29  
30 McAdams: Yes.  
31  
32 Murphy: Ms. ...  
33  
34 McAdams: I think that was suggestion ...  
35  
36 Murphy: Ms. Curry. I, I think that the difference on our list really extends from the  
37 fact of the individual that wrote on the map how they termed things.  
38  
39 Curry: Thank you.  
40  
41 Herrera: Mr. Chair. I'm willing to make the motion. I just want to clarify what roads  
42 we're talking about for the road diets. So we got Spruce, Alameda and ...  
43  
44 Pearson: Idaho.  
45  
46 Herrera: Idaho, okay.

1  
2 Curry: Walton's is a road diet, CLC06.  
3  
4 Herrera: Okay. So I don't even know how to make that motion. Mr. Chair. I move  
5 that we direct MPO staff to group projects together and submit them to the  
6 City for the ICIP. Is that clear enough? I don't ...  
7  
8 Pearson: Well actually list the groups.  
9  
10 Herrera: Okay. So the groups would be pedestrian projects, bicycle projects, and  
11 then road diet projects, and the road diets are to include all the, the roads  
12 that we just listed.  
13  
14 Curry: Might we say rather than ped, bicycle projects and road diets, cause road  
15 diets will be more specific to bicycles, multi-use or multimodal projects?  
16 Because if there's some like those ones that if Mr. McAdams was talking  
17 about a separate, a separated lane like a multi-use trail maybe we should  
18 include those as bicycle/pedestrian as opposed to pedestrian refuges.  
19 Are there any that we're talking about specifically that would be  
20 separated? You're talking about on University at I-10 would be a multi-use  
21 ...  
22  
23 McAdams: That, again like Mr. Murphy, that came from a comment. I think they were,  
24 the person wanted to, was talking about multi-use.  
25  
26 Curry: So maybe we should separate them as multi-use, road diet which is  
27 specific to bicycle, and then pedestrian which is more the pedestrian  
28 refuge.  
29  
30 Herrera: Well road diets aren't specific to bicycles. I mean road diets help.  
31  
32 McAdams: Well yeah.  
33  
34 Herrera: Everything, all elements.  
35  
36 Curry: But you couldn't, you're not necessarily going to walk with a road diet. I  
37 mean you, it's going to make walking safer but it's really more of a you  
38 know ...  
39  
40 Herrera: Well road diets can add room to add sidewalks too.  
41  
42 Curry: Got you. Yeah.  
43  
44 Herrera: So I mean ...  
45  
46 Curry: Yeah.

1  
2 Herrera: I think we need to look at all of those ...  
3  
4 Curry: Yeah.  
5  
6 Herrera: Elements.  
7  
8 Curry: Okay.  
9  
10 Nunez: And potentially bike paths too.  
11  
12 Curry: Multi-use paths.  
13  
14 Nunez: Well multi-use, well yeah.  
15  
16 Pearson: Want to try again?  
17  
18 Herrera: Not really.  
19  
20 Murphy: Mr. Chair. If, if I may, I'm, this isn't a formal action going up to the Policy  
21 Committee so I think staff is probably comfortable just based on  
22 discussion on, on what idea we have to go ...  
23  
24 Pearson: Okay.  
25  
26 Murphy: Go forward. I don't, don't think we need to twist, or figure out a way to  
27 make it fit into a motion.  
28  
29 Pearson: Okay.  
30  
31 Murphy: And then just to kind of, hopefully the last thing I, I have to say is we've  
32 also been invited to do, to, to get involved into the County's ICIP process  
33 come January so take some time, think over what County projects that,  
34 that we could be submitting applications for as well.  
35  
36 Pearson: Okay.  
37  
38 Murphy: But ...  
39  
40 Pearson: So we can ...  
41  
42 Murphy: I think we're ...  
43  
44 Pearson: Talk about this next time.  
45  
46 Murphy: Comfortable without a motion or a vote.

1  
2 Pearson: Okay.  
3  
4 Murphy: If the, if the Committee is comfortable.  
5  
6 Curry: May I, may I make a request? Because you have to get this in by  
7 November 1st there really isn't time for another meeting for us to sit, but  
8 would you be willing to e-mail us before it goes forward so that we can see  
9 how it finally goes as a recommendation? I mean I know we're only ten  
10 days out but I'd like to see before it goes forward, just what it finally boiled  
11 down to.  
12  
13 Murphy: Yeah. I think we can e-mail you what I, it, it's fairly, fairly small document  
14 sizes so I think Michael can get those e-mailed out.  
15  
16 Curry: Thank you.  
17  
18 Pearson: Okay. So I think we can move on then.  
19

## 20 **6. COMMITTEE AND STAFF COMMENTS**

### 21 22 **7.1 MPO Staff Update**

23  
24 Pearson: So we're after our 7:00 closing time so are there any important staff  
25 comments?  
26

### 27 **7.2 Local Projects update**

28  
29 Pearson: Any important updates that anybody wants to offer? County?  
30

31 Castillo: Just real quickly. So we did have a, a TAP project that went through the  
32 El Paso MPO, we mentioned that the last time. So it made it through the  
33 Technical Committee and it made it through the Transportation Policy  
34 Advisory Board so it should be on its way to Santa Fe for review and  
35 competition I guess. And also I would like to reiterate something that Ms.  
36 Curry had mentioned about the need for like a regional map of projects, of  
37 both bicycle and pedestrian projects. I think we can all can benefit from  
38 that. So hopefully maybe come the next calendar year or something we  
39 can, we can work on together. Thank you.  
40

41 Wray: We're, excuse me Mr. Chair, Mr. Castillo. When you say "regional map,"  
42 we have the MPO Trail Priorities Plan and the Bicycle Priorities Plan  
43 currently existing on our, our website. Those documents exist. They've  
44 been recommended by this Committee and approved by the Policy  
45 Committee so we do have some vision documents out there for review. I

1 don't know if that's exactly what you're, you're asking for but we do have  
2 some, some documents in that line that exist now.  
3  
4 Castillo: Well as we move forward with this list that we have ...  
5  
6 Wray: Okay.  
7  
8 Castillo: The, the, the, the new list.  
9  
10 Wray: Okay. Got you.  
11  
12 Pearson: Okay. James.  
13  
14 Nunez: If I could, yes. I have a couple things. I'll be, I'll be brief as I can here.  
15 For the City updates real fast, right, cause we're trying to close the  
16 meeting.  
17  
18 Pearson: Right.  
19  
20 Nunez: The Dam Trails is about 80% and with the big rains they did actually have  
21 some washout and stuff and those are for, for the trails so they're going to  
22 work on trying to do maintenance and assess how to drain those better.  
23 And then I did have some information of course on those road diets and  
24 all. But then to jump head, we're doing a bunch of ADAs. You see along  
25 Solano ramps, etc. and then Palmer Subdivision and MacArthur school  
26 will have that coming up soon. But I think a number of you know that in  
27 our work study, or our work session we had in September we talked  
28 about, I talked about trying to get some green bike paths in the city. What  
29 I learned in talking to Mr. Soo Gyu Lee is that he's really pretty much  
30 under, underfunded even to keep the other stop bars and other hangings  
31 of, and crosswalks and everything else so he's, it's a real challenge for  
32 him. So that's why they really haven't gone with additional, like the green  
33 bike paths indicators. But what I was able to arrange with his permission  
34 was for Ennis-Flint, E-N-N-I-S F-L-I-N-T, Ms. Kara Griffin has, well is going  
35 to actually donate quite a bit of material for us to be able to put some  
36 indicators down and with Mr. McAdams we were able to find a pretty good  
37 location where we can get those donated and installed. Here's our hope,  
38 and I'm glad you had, what was his name, Marcus in your office and you  
39 guys had done the study and I don't remember if you all saw this or  
40 remember it from the work group but this is the map that they had of the  
41 pedestrian and bicycle crashes in the city. And you can see the  
42 concentrated areas in red close to the, along University Avenue and then  
43 over here at Missouri and then also at the south, south end of Main Street  
44 along what we call the racetrack. The, and I almost brought up with this in  
45 our last discussion too, because if you lay this map over the map you still  
46 have up here on the Recommended Bicycle and Pedestrian Projects,

1 some of this overlaps this. So even to that end if you use this and maybe  
2 your argument to the City Council Members is that your hope is, is to have  
3 less crashes and more bicycle facilities, right that you hopefully would  
4 reduce crashes. So anyway to get to the point is that what we've decided,  
5 have found an area within this red region is at the corner of Locust and  
6 University. There is a pretty neat facility there. They have the center bike  
7 lane that goes in to go straight heading south onto campus. So Ms. Kara  
8 Griffin is going to do a demonstration for us and have this thermal plastic  
9 where they heat it up with a torch and we're going to have green patches  
10 there. It's going to say "Bike" and then a, probably a straight arrow. And  
11 then additionally at, at Locust, same intersection right by that bar, I can't  
12 know the name of it anymore, but going north on Locust and University  
13 we're going to have a bicycle symbol in the bike path and then an, and  
14 also a wide arrow on green. So we're working out the details to see when  
15 we might be able to do that but it's looking like right now maybe the last  
16 week in November or first week in December. So hopefully, and here's  
17 the idea is hopefully we can somehow get maybe the Council, person in  
18 charge, I think it's Smith for that region at the university there and then  
19 have others hopefully at some point find a way to, to fund Mr., the Traffic  
20 Department at the City and then even whoever else. You know the,  
21 hopefully it'll reduce accidents, increase awareness that the paths are  
22 there and, and also hopefully find a means to, to dig, get funds for more of  
23 these. So that's the current plan.

24  
25 Pearson: Okay.

26  
27 McAdams: Mr. Chair. Can I comment real quickly? We are now monitoring that  
28 corner. We've put out video cameras at, we're now at two sides and  
29 we're, we're going to count the cars, excuse me, counts of bicycles and  
30 also look at vehicular movement with conflicts there as well. So we have,  
31 hopefully went, we'll have a before and after, before the situation before  
32 the, the bike, green bike lanes and after too. So I think this will be, we're  
33 hoping this will be a impetus to look at, for the City to consider this as part  
34 of their, their regular process and institutionalize the process. Santa Fe is  
35 already, they're in the process of looking at bike lanes and they are trying  
36 to make this a, an institutional part of their but, you know their, their  
37 restripings etc. and often these can be done, the green bike lanes can be  
38 done at the same time they're doing routine maintenance.

39  
40 Pearson: Okay.

41  
42 **7.3 NMDOT Projects update**

43  
44 Pearson: Okay. NMDOT is on break.

1 Herrera: Mr. Chair. There's really no construction projects going on in the city. The  
2 next one coming up will be the intersection of Spitz/Solano/Three Crosses.  
3 That one goes to bid next month, in November so we should start seeing  
4 construction spring of next year. It's going to be a mess but we're hoping  
5 to get it done quicker than the last phase went. And then also just so the  
6 Committee Members know I delivered a set of plans to the Chair for the  
7 project over the Pass, widening the shoulders and adding the bike lanes  
8 and things so we hope to get comments from him on those and we ...  
9

10 Pearson: If anybody wants to see those at some point let me know and we'll get  
11 together.  
12

13 Herrera: And everything else is peachy.

14 Pearson: Okay.

17 **7. PUBLIC COMMENT**

18 Pearson: We're on to public comment. Anybody from the public? Seeing none.  
20

21 **8. ADJOURNMENT (7:31 p.m.)**

22 Pearson: Motion to adjourn?  
24

25 Herrera: So moved.

26 Curry: Second.  
28

29 Pearson: All in favor, "aye."  
30

31 MOTION PASSES UNANIMOUSLY.  
32

33 Pearson: We're adjourned. Thank you.  
34  
35

## MESILLA VALLEY METROPOLITAN PLANNING ORGANIZATION BICYCLE AND PEDESTRIAN FACILITIES ADVISORY COMMITTEE ACTION FORM FOR THE MEETING OF January\_17, 2017

### AGENDA ITEM:

5.2 Proposed FY2017- FY2018 UPWP Amendment

### ACTION REQUESTED:

Review and recommendation for approval to the MPO Policy Committee

### SUPPORT INFORMATION:

Proposed Revision of FY2017-2018 UPWP

### DISCUSSION:

On December 30, 2016, it was confirmed by the New Mexico Department of Transportation, Division of Rail and Public Transit that the Mesilla Valley MPO could use carry-over monies from FY2016 and use it for projects in FY2017. The amount of the carry is \$66,910 (See Exhibit 5.2 A.) Staff proposes that this money be used to contribute additional money to assist in the City of Las Cruces Active Transportation Plan; and to purchase software to facilitate the tabulation of the data from the Automatic Passenger Counters installed on the buses of RoadRUNNER Transit.

In the FY2017-2018 UWP, this would consist of:

1. Adding an additional item "Purchase transit passenger counting" in the Main Products and Schedule by Month section in Task 3.1 Traffic Counting and Reporting.;
2. Deleting the item "Sub-plan: Coordinated human Services" in the Main Products and Schedule by Month section in Task 4.1 Metropolitan Transportation Plan
3. Add an additional item in Task 5 as follows:

#### **5.5 Participation in City of Las Cruces Active Transportation Plan**

Participate and contribute funds to the efforts of the City of Las Cruces Community Development Department, Long Range Planning and Revitalization Division to develop an Active Transportation Plan. Active transportation refers to a group of transportation modes which rely on human power such as bicycles and pedestrians. This Plan further builds on the goals of the MPO's MTP to encourage non-motorized transportation in order to assist in the reduction of air pollution, vehicular crashes and the creation of a more livable and healthier community

Responsibilities: City of Las Cruces Community Development Department Long Range Planning and Revitalization Division, MPO staff, contracted consultant

Source of Funds: FHWA, FTA, Local Funds for Match

Main Products and Schedule by Month

**To:** Tom Murphy <[tmurphy@las-cruces.org](mailto:tmurphy@las-cruces.org)>  
**Subject:** RE: FY16 carryover for MVMPO

Tom,

\$66,910 is the federal amount. The local amount is \$16,727.

Hope this helps.

Marcy
