MESILLA VALLEY METROPOLITAN PLANNING ORGANIZATION
TECHNICAL ADVISORY COMMITTEE

The following are minutes for the meeting of the Technical Advisory Committee of the Mesilla Valley Metropolitan Planning Organization (MPO) which was held June 1, 2017 at 4:00 p.m. in Commission Chambers at Dona Ana County Government Building, 845 Motel Blvd., Las Cruces, New Mexico.

MEMBERS PRESENT: Mike Bartholomew (CLC Transit) (arrived 4:09)
Bill Childress (BLM)
Todd Gregory (LCPS)
John Gwynne (DAC Flood Commission)
Jolene Herrera (NMDOT)
Soo Gyu Lee (CLC)
Harold Love (NMDOT)
Debbi Lujan (Town of Mesilla)
Rene Molina (DAC Eng.)
Albert Casillas proxy for Luis Marmolejo (DAC Planning)
Lily Sensiba (EBID)
Larry Shannon (Town of Mesilla)
Tony Trevino (CLC Public Works)

MEMBERS ABSENT: David Armijo (SCRTD)
Dale Harrell (NMSU)

STAFF PRESENT: Tom Murphy (MPO Staff)
Andrew Wray (MPO Staff)
Michael McAdams (MPO Staff)
Dominic Loya (MPO)

OTHERS PRESENT: Becky Baum, RC Creations, LLC, Recording Secretary

1. CALL TO ORDER (4:03 PM)

Trevino: Okay we’re going to call this meeting to order for the Mesilla Valley Metropolitan Planning Organization Technical Advisory Committee. We’ll start with roll call on the left of me.

Gregory: Todd Gregory, Las Cruces Public Schools.

Herrera: Jolene Herrera, NMDOT.

Bartholomew: Mike Bartholomew, City of Las Cruces RoadRUNNER Transit.

Childress: Bill Childress, Bureau of Land Management.
Lee: Soo Gyu Lee, City of Las Cruces.

Trevino: Tony Trevino, City of Las Cruces.

Casillas: Albert Casillas, Dona Ana County, Proxy for Luis Marmolejo.

Gwynne: John Gwynne, Dona Ana County Flood Commission.

Lujan: Debbi Lujan, Town of Mesilla.

Love: Harold Love, New Mexico DOT.

Shannon: Larry Shannon, Town of Mesilla.

Sensiba: Lily Sensiba, EBID.

Molina: Rene Molina, Dona Ana County Engineering.

2. APPROVAL OF AGENDA

Trevino: Okay. The first item on the agenda is approval of the agenda. Everybody get a chance to take a look at it? Are there any questions? Hearing nothing, all in favor?

Wray: We need a motion and a second.

Trevino: Hear a motion?

Bartholomew: I move we accept the agenda.

Gwynne: So moved.

MOTION PASSES UNANIMOUSLY.

Trevino: Okay.

3. APPROVAL OF MINUTES

3.1 May 4, 2017

Trevino: Next item is the approval of the minutes from last month which was April 6, 2017. Do I hear a motion to accept the agenda, I mean the minutes?

Shannon: I’m sorry. Kind of quick question about the minutes. I wasn’t here at the last one but there appear to be some discrepancies in here. It looks like if you look at the date on this it says April 6th and then the roll call there are
some people that appear in the minutes that are not in the roll call, so I was just wondering if these minutes were the correct minutes with the correct date.

Wray: Mr. Chair, Mr. Shannon. That is a very good question. It's my belief that the correct minutes were put in there but the dates do seem to be wrong. I'm not sure if there is some error. We had, staff recommends that we table the minutes and reevaluate them and then bring them back at the next TAC meeting.

Trevino: We have a motion for that? Do I hear a motion to table minutes?

Bartholomew: I move we table the minutes till the next meeting.

Shannon: Second.

Trevino: All in favor?

MOTION PASSES UNANIMOUSLY.

Trevino: Motion to table the minutes passes.

4. PUBLIC COMMENT

Trevino: The next item on the agenda is public comment. Is there anybody out there with comments? I see none.

5. ACTION ITEMS

5.1 Recommendation of Approval to the Policy Committee of the FFY 2018-2023 Transportation Improvement Program (TIP)

Trevino: So we'll move on to action items.

ANDREW WRAY GAVE HIS PRESENTATION.

Trevino: I see no questions.

Wray: We need a motion and second.

Trevino: Do I hear a motion to approve?

Bartholomew: I move we recommend the TIP to the Policy Committee.

Herrera: I second.
Trevino: All in favor?

MOTION PASSES UNANIMOUSLY.

Trevino: Motion passes unanimously.

6. DISCUSSION ITEMS

6.1 TAC Responsibilities Discussion

Trevino: Next on the agenda is discussion items, 6.1 is the TAC Responsibilities Discussion.

ANDREW WRAY GAVE HIS PRESENTATION.

Trevino: Andrew. Can you go back a couple slides to where you had the, one more I think, one more, right here where you say, very top bullet, 75% of the Committee meetings in a 12-month calendar period, membership will be terminated. Is that for the individual or is that for the municipality or the...

Wray: That's for the seat.

Trevino: The seat.

Wray: Yes. For the seat where your individuals are not represented on the TAC. It's jurisdictions, specific departments within jurisdictions that are represented. So it's not against a person per se but it's against the seat.

Trevino: Okay. Thank you.

Childress: Does that include proxies or if the proxy is appointed and approved to attend the meeting it qualifies as an attendance, is that correct?

Wray: Mr. Chair, Mr. Childress. Yes, that's correct. There's no language in the bylaws specifically saying that. That's just been the historical practice. That's one of the changes that we're going to be presumably looking at including specific language to that effect in the bylaws.

Childress: Thank you.

Gwynne: Andrew. When it comes to the proxies, I believe there's a process, isn't there, for appointing a proxy?

Wray: Mr. Chair, Mr. Gwynne. The process is basically staff needs written notification from the individual that they will not be in attendance and the
name of the individual that we should expect to attend the meeting in their place. As far as language that would go in the bylaws to that effect, effectively it would have to be written notification.

Gwynne: Thank you.

Wray: And "written notification" covers e-mail as well so that'd be adequate.

Gwynne: Okay.

Trevino: I see no other questions so go on to discussion item 6.2.

Bartholomew: I did have a question, I'm sorry.

Trevino: Oh. Sorry.

Bartholomew: Is the other, is the BPAC having the same issue too, or is it mainly the TAC that's ... 

Wray: Mr. Chair, Mr. Bartholomew. It's been a bit uneven. BPAC recently has had better attendance than this Committee has but both have had their issues in the past.

Bartholomew: Okay. And maybe somehow even, whether it's outlined in the bylaws or another way, maybe if there is a seat that's having an issue or something maybe there can be, it can be brought up at a meeting that, so that we're aware. We can talk to our peers and say, "Hey, you know, come here and."

Wray: We're going to be looking at a number of options to try to improve the situation.

Bartholomew: And my last question on the Technical Advisory Committee, the membership, it does, the TAC can add members according to the bylaws but it does list all the membership too, in Part A. So I was wondering if there is an update to the bylaws if the, is it the SCRTD, right, is the other one that's not listed in the bylaws right now.

Wray: Yes. That would be part of the addition.

Bartholomew: Okay. Thank you.

6.2 NACTO Bicycle Design Standards

Wray: Anyway. I would like to introduce at this time Mr. Michael McAdams who's going to give the presentation on the NACTO Standards.
MICHAEL MCADAMS GAVE HIS PRESENTATION.

Bartholomew: Mr. Chair. Are there any guidelines in this NACTO about transit bike lane interaction?

McAdams: There is not specifically, there's a separate document for transit facilities but (inaudible) there's a second, another guide. This guide is particularly just for bicycles and pedestrians, primarily bicyclists.

Bartholomew: The reason I was asking is in places like on Solano or where we've had bus stops or other areas that there are bike lares designated on our streets right now and the complaints I've heard we've had is you know our bus pulls in, pull over to a stop and block the bike lane. And I'm just wondering from a design standard if there's better ways to handle that.

McAdams: Well one way that, just off the cuff, one way to accommodate that is by a bulb where you put the sidewalk a little bit out, that will do some of that as well, sort of prevent you know that kind of motion. I'm not really sure. I didn't look into that more carefully but I think there's probably some things to be done. Oh well, there's one which is actually a designated stop area. It says that no, you know that's where the bus will stop in a combination with that, a little bit of I guess in-the-center parking, the designated box for the buses.

Bartholomew: So like a, basically a pullout for a bus.

McAdams: Exactly. And so it's a pullout but on the street but designated by markings. So that's a partial solution but I can't address that fully because I think you'll have to look to the guide for that, but I'm sure there's some ways to accommodate bicycles and buses and motor vehicles.

Bartholomew: Thank you.

McAdams: Thank you.

Trevino: I got a question. One of the main I guess roadblocks that we have with redesigning some, or rehabilitating some of the roads in Las Cruces is restricted by the right-of-way, especially these residential areas where they are requiring still their parking, a lot of these want the parking right adjacent to the curb and allowing for two-way traffic on here. So just, when this goes to get adopted by City of Las Cruces, wherever, that you do get the input from Public Works and which would be streets and everybody. Because a lot of these do not fit a lot of our rehabs and a lot of our existing cross-sections for our roadways, whether it be local, some collectors, or even arterials is the way stuff is working out. In regards to
the bus pullouts, again that's been a right-of-way issue and everything, trying to make, accommodate both of them for both things. So just before kind of we start to implement a lot of these more restrictions on roadway and cross-sections that we do get everybody's input to see the feasibility of a lot of the stuff.

McAdams: Yeah. Mr. Chair, Mr. Trevino. These are guidelines and they're not in ordinances so it's, the one thing that's always put is a caveat in the guideline is that it's up to the engineers or other judgment. So it's really saying, "You can go beyond," or gives the engineers the ability to go beyond normal standards. And so it's a guideline and that's it, but it's, if you want to accommodate this would be the ideal, you know. Because it's really, and some roads do not accommodate bicyclists in that manner.

Trevino: Okay. Thank you.

Lee: Mr. Chair. I have some comments. The first comment is have you ever, looking at the operation impact ...

McAdams: Yeah.

Lee: Operational impact to the operational cost. How much do you think is going to be impact to the operational cost?

McAdams: Mr. Chair, Soo Gyu. The guidelines do not really address operational cost. It just, they're basically, "Here's the street. If we add this, you know bike lanes, buffered bike lanes, this is the design standard." But it does not address operational cost.

Lee: I understand your point but whenever we add more stuff then we have to also think about the life cycle cost. Once we add any new stuff, for example any green bicycle marking, do you know that cost is almost three, four times expensive than the normal pavement marking? Then it's going to directly impact the other, the operational aspect which means it's going to directly impact not only the, your bicycle but as you know we have to look at overall use which means that we have to consider vehicle and pedestrian and the bicycle and the transit. So I understand that this is a guideline but I'd like you to make sure to look at the other aspect will impact your decision.

McAdams: Mr. Chair, Soo Gyu. These are really, again I emphasize these are engineering type of decisions. They're not covered in guideline. But they're, we know that there's advantage of green bike lanes with designate so people don't do things like cross over them, often they do, or park in them. And so these are reinforced or to protect bicyclists more or to make people aware. But as far as our operational cost and maintenance, that's
really, it's not covered. But I agree with you. There are additional operational costs to do that but I think that's really up to the City and the Town of Mesilla and the County to really address when it's appropriate to have green bike lanes or bike boxes or any kind of treatment that's related to bicyclists.

Lee: The other comment is that from my perspective the best way we can implement any NACTO guideline or any recommended pavement marking or sign or any kind of more bicycle-friendly facility is with better change our City Design Code and it will directly impact future projects and as long as the right-of-way condition and the funding is available I definitely agree about the NACTO. But some of their, you know the location, like Tony mentioned, it's going to be almost impossible to utilize this one. But at least as long as we change our City Design Code and it's going to impact any new subdivision or any new street. So I think it's a really good idea to go by the NACTO on that area plus any area in the Downtown area or any street that's more like a, the good example is Main, you know the North Main Street on the Downtown area, I believe that's a good, the place we can start to test some the new stuff in the City and also the University area. But the only concern about the University Corridor, my understanding is it is the arterial so we have to be balanced between the bicycle and the pedestrian and then also the vehicle and the transit.

McAdams: I agree.

Love: Mr. Chair. Is this guide supposed to supersede all the other existing guides that came before it, like the AASHTO guidelines or the MUTCD?

McAdams: No. They're compatible with the MUTCD and AASHTO. What it does is simply urban context and say, "Well maybe there'd be more suitable for urban setting." The AASHTO's our general guidelines as you know. But it's not discounting the AASHTO or the MUTCD. In fact I said before the MUTCD has really been endorsed, or the NACTO guide have been endorsed by the FHWA. So I don't see them as superseding but supplementing, or supplemental.

Bartholomew: Mr. Chair. I had one more question. Was it these kind of guidelines, wasn't there, I saw something about a demonstration that might've, I think it was canceled that was planned for sometime last year on University Avenue. Was that doing an aspect of this just as a demonstration? Could you kind of expand that?

McAdams: Mr. Chair, Mr. Bartholomew. That's true. We were planning on a demonstration project but there was complications. But that, was the green bike lanes were example of a thing that, of items related in the NACTO standards. So demonstrative of a, at a really good, one of the
most dangerous intersections for bicyclists, Locust and University, but also as a test to see how people reacted to the green bike lanes. So yes, the green bike lanes proposed demonstration were in compliance with the NACTO standards.

Bartholomew: Is there any, whatever the complications were, is there any, is it going to happen in the future that there might be a demo like that somewhere?

McAdams: I would hope so. I would like to see it done and I think it'd be a good demonstration to the public of potential for that kind of treatment. But I think it's on hold but I would really like to see it done.

Bartholomew: Okay. Thank you.

Trevino: And I would really push maybe, yes and get a section that'd be an example of that green bike lane so City staff can see the lifespan of that, the deterioration of that, and kind of the expectancy of that so we can kind of start to put that into our operational budget and cost. But I think having an example set forth so we can have a baseline set to see if it is feasible in the City would be a great opportunity for both parties. Thank you. I see no other questions.

7. COMMITTEE AND STAFF COMMENTS

7.1 City of Las Cruces, Dona Ana County, Town of Mesilla, Las Cruces Public Schools, RoadRUNNER Transit, SCRTD Project Updates

Trevino: Move on to Committee and staff comments. Start with the City of Las Cruces. There are no updates on our projects at this point. Dona Ana County.

Molina: Dona Ana County does not have any updates on any projects as well. Thanks.

Trevino: Town of Mesilla.

Shannon: Town of Mesilla does not have any updates.

Trevino: Las Cruces Public Schools.

Gregory: Yes. Update, just our Safe Routes to School program, again this year 20 elementaries had regular walk and bike trains, walking, school buses or bike trains. We also were able to do the bike and pedestrian education curriculum in 22 of the elementary schools and we're currently working on expanding that from the first and third grade to probably the fifth grade using the PE teachers in all the elementary schools.
International Walk to School Day was 100% participation in September through October. We also had the Family Bike Fiesta which was at Young Park in April and we fixed a lot of bikes, handed out a lot of helmets, and had a lot of volunteers that assisted during that day.

And then National Bike to School Day, 22 elementary schools participated. We also had a kind of a bike and then camp night on May 20th. They rode some of the bike paths throughout, around Llorona Park, through I think Mesilla, and then back towards Mayfield in the Bruins Lane area, and then they camped at Mayfield overnight with the parents and the kids, and Ashleigh Curry coordinated that. We also continued our bus driver education for the bike laws, pedestrian laws related to school buses. And then we just finished collecting a lot of our evaluation from the schools and interviews with principals so that we can finish up a pretty thorough evaluation of the program on this year's as well as previous years'. So and that's kind of where we stand right now.

Trevino: Thank you. RoadRUNNER Transit.

Bartholomew: The City's Transit Section's been working with the MPO on doing an inventory of all of our bus stops out there, what's there, pictures of the bus stops, ADA aspects of the bus stops out there. This was started in this past fiscal year by an intern who developed a mobile app who could go out and start taking some of the data, and we're looking at expanding that to include more of the, especially the ADA stuff. The City's working on its ADA Transition Plan and this is one of the aspects that Transit is doing, is looking at all of our bus stops for accessibility of our bus stops and what we could or couldn't do at these bus stops. And we really appreciate the help that we're getting. Thank you.

Trevino: I hope I get this right. South Central Regional Transit. Are they present? No?

Bartholomew: I can say that, I know that they're having their grant audit today, so that's probably why he's not here.

7.2 NMDOT Projects Update

Trevino: NMDOT project update.

Herrera: Thank you Mr. Chair. We have just a couple of projects in construction now. The big one is the intersection of Spitz/Solano/Three Crosses and US-70. That one is going well so far. We're just a month or so in. We have about another 11 months to go. It should take about a year to complete that project but so far traffic has been moving smoothly through the area. We do have monthly public meetings. If there are any concerns, it's the third Thursday of the month at 6:00 p.m. at the Solano
yard. The NMDOT office is there. And I believe the MPO is sending out the public notices or posting them on their website as we get the public notices out there.

The other project that we have right now is the intersection of 17th Street and Picacho. We are installing traffic signals there and that project will be pretty quick. We wanted to wait until school was out so that the buses wouldn't be impacted and the contractor has told us that it will be done by the time school starts again. So just a couple of months to get that project all completed.

Another project that's coming up probably in the next three or four months is on US-70 over the Pass and we are widening shoulders from basically Organ to the White Sands interchange. And so that's just to make it a little bit safer and more comfortable for cyclists to ride on that section of road and then it also helps us get rid of that gap in our State Bike Route 7 that goes all the way from, oh I don't know where it starts, somewhere over by the airport and goes all the way through Alamogordo to Roswell. So that was the only little gap and we're addressing that. It just let this past month so we should see construction out there probably fall of this year.

In design we have the Valley Drive project. That one the plans are supposed to be turned in in three weeks so we're very near the end of design on that. We should be letting here probably in the late summer with construction starting early next year. And that's all I have. If there's any questions I'd be happy to answer them.

Bartholomew: Mr. Chair. Actually the discussion on the Picacho/17th light, I did have a question of the City and how's the, what's the timeline looking like for the traffic light at Melendres and Amador?

Trevino: I believe now. This is not my project but the environmental got approved about a couple weeks ago so I think plans are very near to be finalized so we can get that out. So I think they're just waiting on the proper paperwork for all the environmental stuff and so, think probably about the end of summer should probably go out to bid.

Bartholomew: It'll be let at the, do you think it'll be done by the end of the calendar year, that light'll be in?

Trevino: You know I am not familiar with the extents of the construction. I know it's some median cuts and some curb so I'm guessing probably about eight months or so.

Bartholomew: Okay. Thank you.

Sensiba: Excuse me, hi. The Melendres and Amador light, that's right next to the EBID office and they've started construction today. Our main entrance
where the curb is has been torn up and we're having to go in through the
back route, and they said they would be done with the curb construction
near our office by Monday. So they've already started that project and are
moving slowly towards the street there.

Lee: Let me give a little more information about what activity you saw today.
There's two separate projects, one for the actual installation of the traffic
signal at the intersection and then also we call it "interconnect
construction." So there's a separate contract I'm managing right now. In
the contract they already put the pathway from Melendres and the El
Molino to the intersection. So they're going to finish that little section I
believe within a week or two weeks. So that's a complete separate project
but it is together.

7.3 MPO Staff Projects Update

Trevino: And so we move onto MPO staff update.

McAdams: Just a few ones. Our next meeting will be on August 3rd. It will not be
here. It will be in the City of Las Cruces Council Chambers so if you come
here you won't find anybody here.

And also we're expecting delivery of the software Rideshare Plus
which will integrate with automatic passenger counts. We discussed that
last time. And we expect that hopefully before June 30th and this will help
us with looking at operations better, planning purposes, and for
monitoring. And that's all I have.

Lee: Mr. Chair. I have a question to the staff. You know last time you guys
mentioned about the 2016 flow map. Is it still not ready?

McAdams: No, it's on our website at this moment. You can download it. If you need
it printed out we'll be glad to do that.

8. PUBLIC COMMENT

Trevino: Okay. We'll move on to public comment. I see none.

9. ADJOURNMENT (4:46 PM)

Trevino: So I'm going to look for a motion to adjourn.

Bartholomew: I second.

Trevino: All in favor?

MOTION Passes Unanimously.
Trevino:  We are adjourned.

Chairperson
